Title: Crop Acreage and Yields and
Water Distribution.

Abstract: The annual crop census is
taken on certain Reclamation projects
primarily for use as a tool in
administering, managing, and
evaluating various aspects of the Federal
reclamation program. The census is
used to assist in the administration of
repayment and water service contracts,
which are used to repay the irrigators'
obligation to the Federal government.
The census will provide data to

facilitate the required 5-year review of
ability-to-pay analysis, which is being
incorporated into new repayment and
water service contracts. The basis for
these reviews is an audit by the Office
of the Inspector General, Department of
the Interior.

Data from the census are utilized to
determine class 1 equivalency
computation; *i.e.*, determining the
number of acres of class 2 and class 3
land that are required to be equivalent
in productivity to class 1 land.

In recent years, the census has
provided data which are used to
administer international trade
agreements, such as the North American
Free Trade Agreement. Data from the
census are also used by the Office of the
Inspector General, Government
Accountability Office, and the
Congressional Research Service to
independently evaluate our program
and to estimate the impacts of proposed
legislation. These data are supplied to
other Federal and State agencies to
evaluate the program and provide data
for research.

The required 60-day comment period
was initiated by a notice published in
the **Federal Register** on September 19,
2005 (70 FR 54960, Sept. 19, 2005). No
comments were received in response to
the 60-day comment period.

Frequency: Annually.

Respondents: Irrigators and water user
entities in the 17 Western states who
receive irrigation water service from
Bureau of Reclamation facilities. Also
included are entities who receive other
water services, such as municipal and
industrial water through Bureau of
Reclamation facilities.

**Estimated Total Number of
Respondents:** 1,325.

**Estimated Number of Responses per
Respondent:** 1.0.

**Estimated Total Number of Annual
Responses:** 1,325.

**Estimated Total Annual Burden on
Respondents:** 2,075 hours.
