SUPPLEMENTARY INFORMATION:

Background

The Skate FMP was implemented in September 2003. The primary objectives of the Skate FMP are to: (1) Protect the overfished species of skates and increase their biomass to target levels specified in the FMP while preventing overfishing of the other skate species; and (2) collect information critical for improving knowledge of skate fisheries by species and for monitoring the status of skate fisheries, resources, and related markets, as well as the effectiveness of skates management approaches. The FMP includes reporting requirements to improve fishery information, prohibitions on overfished species, a trip limit for the skate wing fishery, and mechanisms for FMP monitoring and plan adjustments. Through the establishment of a "baseline" of management measures in other fisheries, the FMP recognizes the interactions of skates with groundfish, scallops, and monkfish fisheries. In 2006, winter skate was determined to be overfished. Therefore, under the provisions of the Magnuson-Stevens Fishery Conservation and Management Act, the Council must develop and implement a rebuilding plan for this resource.

Measures Under Consideration

The Council may consider a host of management measures to reduce skate mortality, improve reporting, cap or reduce landings, and/or reduce bycatch and discard mortality to prevent overfishing and rebuild overfished stocks. Measures that may be considered include, but are not limited to, a hard TAC for the directed skate fishery, annual catch limits and accountability measures, greater regulation of the fishery through days-at-sea limits, changes to skate possession limits, changes to exempted fisheries and closed areas, new gear regulations, and elimination of the baseline review process and proxy input controls.

It is possible that during the scoping process, other issues will be raised related to the purpose of this amendment, and if appropriate, those issues will be considered by the Council as well.

Scoping Process

All persons affected by or otherwise interested in skate management are invited to participate in determining the scope and significance of issues to be analyzed by submitting written comments (see **ADDRESSES**) and/or by attending one of the scoping meetings. Scope consists of the range of actions, alternatives, and impacts to be considered. Alternatives include the following: Not amending the management plan (taking no action); developing an amendment that contains management measures such as those discussed in this notice; or other reasonable courses of action. Impacts may be direct, indirect, or cumulative.

This scoping process will also identify and eliminate from detailed analysis issues that are not relevant or feasible. When, after the scoping process is completed, the Council proceeds with the development of an amendment to the Skate FMP, the Council will prepare an EIS to analyze the impacts of the range of alternatives under consideration. The Council will hold public hearings to receive comments on the draft amendment and on the analysis of its impacts presented in the EIS.

The Council will discuss and take scoping comments at the following public meetings:
