

sulfur (inorganic polysulfides) included in this notice.

Although the lime-sulfur (inorganic polysulfides) RED was signed on September 30, 2005, certain components of the document, which did not affect the final regulatory decision, were undergoing final editing at that time. These components, including the summary of labeling changes, appendices, and other relevant information, have been added to the lime-sulfur (inorganic polysulfides) RED document. In addition, subsequent to signature, EPA identified some minor errors and ambiguities in the document. Therefore, for the sake of accuracy, the Agency also has included the appropriate error corrections, amendments, and clarifications. None of these additions or changes alter the conclusions documented in the September 30, 2005, lime-sulfur (inorganic polysulfides) RED. All of these changes are described in detail in an errata memorandum which is included in the public docket for lime-sulfur (inorganic polysulfides).

EPA is applying the principles of public participation to all pesticides undergoing reregistration and tolerance reassessment. The Agency's Pesticide Tolerance Reassessment and Reregistration; Public Participation Process, published in the **Federal Register** on May 14, 2004, (69 FR 26819)(FRL-7357-9) explains that in conducting these programs, the Agency is tailoring its public participation process to be commensurate with the level of risk, extent of use, complexity of issues, and degree of public concern associated with each pesticide. EPA can expeditiously reach decisions for pesticides like lime-sulfur (inorganic polysulfides), which pose few or no risk concerns, affect few stakeholders, and require no risk mitigation. Once EPA assesses uses and risks for such low risk pesticides, the Agency may go directly to a decision and prepare a document summarizing its findings, such as the lime-sulfur (inorganic polysulfides) RED.

The reregistration program is being conducted under Congressionally mandated time frames, and EPA recognizes the need both to make timely decisions and to involve the public in finding ways to effectively mitigate pesticide risks. lime-sulfur (inorganic polysulfides), however, poses no risks that require mitigation. The Agency therefore is issuing the lime-sulfur (inorganic polysulfides) RED, its risk assessments, and related support materials simultaneously for public comment. The comment period is intended to provide an opportunity for public input and a mechanism for

initiating any necessary amendments to the RED. All comments should be submitted using the methods in **ADDRESSES**, and must be received by EPA on or before the closing date. These comments will become part of the Agency Docket for lime-sulfur (inorganic polysulfides). Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments.

EPA will carefully consider all comments received by the closing date and will provide a Response to Comments Memorandum in the Docket and regulations.gov. If any comment significantly affects the document, EPA also will publish an amendment to the RED in the **Federal Register**. In the absence of substantive comments requiring changes, the lime-sulfur (inorganic polysulfides) RED will be implemented as it is now presented.

B. What is the Agency's Authority for Taking this Action?

Section 4(g)(2) of FIFRA as amended directs that, after submission of all data concerning a pesticide active ingredient, "the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration," before calling in product specific data on individual end-use products and either reregistering products or taking other "appropriate regulatory action."

Section 408(q) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(q), requires EPA to review tolerances and exemptions for pesticide residues in effect as of August 2, 1996, to determine whether the tolerance or exemption meets the requirements of section 408(b)(2) or (c)(2) of FFDCA.

B. What Should I Consider as I Prepare My Comments for EPA?

1. **Submitting CBI.** Do not submit this information to EPA through www.regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. **Tips for preparing your comments.** When submitting comments, remember to:

- i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).
- ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- iv. Describe any assumptions and provide any technical information and/or data that you used.
- v. If you estimate potential costs or burdens, explain how you arrived at

your estimate in sufficient detail to allow for it to be reproduced.

vi. Provide specific examples to illustrate your concerns and suggest alternatives.

vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

viii. Make sure to submit your comments by the comment period deadline identified.

II. Background

What Action is the Agency Taking?

Under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), at the discretion of the Administrator, a Federal or State agency may be exempted from any provision of FIFRA if the Administrator determines that emergency conditions exist which require the exemption. Georgia Department of Agriculture has requested the Administrator to issue a specific exemption for the use of metaflumizone on Brassica leafy vegetables to control the diamondback moth. Information in accordance with 40 CFR part 166 was submitted as part of this request.

As part of this request, the Applicant asserts that the available alternative controls are no longer providing adequate control, and states that resistance to some of them may be developing. The Applicant claims that another control chemical is needed to use in rotation with registered materials, to maintain season long control of the diamondback moth in these crops, and that without adequate control, significant economic losses will be suffered.

The Applicant proposes to make no more than 4 applications of metaflumizone, at a rate of 0.25 lb. active ingredient per acre (no more than 1.0 lbs. a.i. total), on up to 31,000 acres of Brassica leafy vegetables (including but not limited to cabbage, collard greens, mustard greens, kale) and turnip greens, in Georgia, for use year round, resulting in use of up to a total of 31,000 lbs. a.i. total.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 of FIFRA require publication of a notice of receipt of an application for a specific exemption proposing use of a new chemical (i.e., an active ingredient) which has not been registered by EPA. The notice provides an opportunity for public comment on the application.

The Agency will review and consider all comments received during the comment period in determining whether to issue the specific exemption requested by the Georgia Department of Agriculture.

The purpose of the ADA is to provide a clear and comprehensive national mandate to end discrimination against individuals with disabilities and to bring persons with disabilities into the economic and social mainstream of American life; to provide enforceable standards addressing discrimination against individuals with disabilities; and to ensure that the Federal government play a central role in enforcing these standards on the behalf of individuals

with disabilities. Title IV of the ADA adds § 225 to the Communications Act of 1934. Section 225 of the Communications Act, requires the Commission to promulgate regulations that require all domestic telephone common carriers to provide telecommunications relay services (TRS). 47 CFR part 64, subpart F of the Commission's rules, implements certain provisions of the ADA. It contains the operational, technical, and functional standards required of all TRS providers and the procedures for state certification. Although § 225 of the Communications Act imposes on all common carriers providing interstate or intrastate telephone services an obligation to provide to hearing and speech-impaired individuals telecommunications services that enable them to communicate with hearing individuals, and charges the Commission with regulatory oversight, states may seek to establish intrastate relay services that satisfy Federal requirements.

Pursuant to 47 CFR 64.602 Commission's rules, any violation of subpart F by any common carrier engaged in intrastate communications will be subject to the same remedies, penalties, and procedures as are applicable in interstate communications.
