previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Sewage sludge treatment plants.

Estimated Number of Respondents: 54

Frequency of Response: Initially and semiannually.

Estimated Total Annual Hour Burden: 6.209.

Estimated Total Annual Cost: \$2,382,804, which comprises \$100,000 in annualized capital/start-up costs, \$1,890,000 in Operating & Maintenance costs and \$392,804 in labor costs.

Changes in the Estimates: There is a slight reduction in the annual hour burden by 5 hours due to a correction in the Agency Burden Tables. There is no change in the total annual capital or O&M costs currently identified in the OMB Inventory of Approved ICR Burdens.

Dated: April 30, 2007.

Title: Performance Evaluation Studies on Water and Wastewater Laboratories (Renewal).

ICR numbers: EPA ICR No. 0234.09, OMB Control No. 2080–0021.

ICR Status: This ICR is scheduled to expire on July 31, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the Federal Register when approved, are listed in 40 CFR part 9, are displayed either by publication in the Federal Register or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR Part 9.

Abstract: Discharge Monitoring Report-Quality Assurance (DMR-QA) participation is mandatory for major and selected minor permit holders under the Clean Water Act's National Pollution Discharge Elimination System (NPDES), Section 308. The DMR-QA study is designed to evaluate the entire process used by permittees to routinely report monitoring results in Discharge Monitoring Reports (DMRs). The study addresses the analytic ability of the laboratories that perform chemical, microbiological and whole effluent toxicity (WET) analyses required in the NPDES permits and the ability to properly report these results in the DMRs. Under DMR-QA, the permit holder is responsible for obtaining ungraded results of analyses of test samples performed by in-house and/or contract laboratories, and submitting these results to the appropriate federal or state NPDES regulatory authority and the commercial proficiency testing (PT) provider that supplies the test samples. Permit holders are responsible for submitting corrective action reports to the appropriate regulatory authority.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 6.3 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information: and transmit or otherwise disclose the information.

Respondents/Affected Entities:
Respondents in DMR–QA studies are
NPDES permittees designated by the
EPA region or state with permitting
responsibility and the laboratories doing
whole-effluent toxicity testing for these
major dischargers. These respondents
are most likely from the following SIC
Codes: 2011—through 3999—
Manufacturers; 4941—Water supply
systems; 4952—Sewerage systems;
8734—Water testing laboratories.

Estimated Number of Respondents:

Frequency of Response: Once annually.

Estimated Total Annual Hour Burden: 47,351 hours.

Estimated Total Annual Cost: \$2,494,260, includes \$1,240,140 annualized O&M costs and \$1,254,120 annual labor costs.

Changes in the Estimates: There is a decrease of 132,984 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is primarily due to the fact that this renewal ICR does not include burden associated with the Water Pollution and Water Supply studies that were covered under the previous ICR. Some of this decrease was offset by a slight increase in the number of respondents, burden hours and costs for the DMR–QA study

Dated: May 1, 2007.
