

Health Care Provider Education in HIV/AIDS Program (OMB No. 0930-0195)—Extension

The Substance Abuse and Mental Health Services Administration's (SAMHSA) Center for Mental Health Services (CMHS) intends to continue to conduct a multi-site assessment for the Mental Health Care Provider Education in HIV/AIDS Program. These education programs are designed to disseminate knowledge of the psychological and neuropsychiatric sequelae of HIV/AIDS to both traditional (e.g., psychiatrists, psychologists, nurses, primary care physicians, medical students, and social workers) and non-traditional (e.g., clergy, and alternative health care workers) first-line providers of mental

health services, in particular to providers in minority communities.

The multi-site assessment is designed to assess the effectiveness of particular training curricula, document the integrity of training delivery formats, and assess the effectiveness of the various training delivery formats. Analyses will assist CMHS in documenting the numbers and types of traditional and non-traditional mental health providers accessing training; the content, nature and types of training participants receive; and the extent to which trainees experience knowledge, skill and attitude gains/changes as a result of training attendance. The multi-site data collection design uses a two-tiered data collection and analytic

strategy to collect information on (1) the organization and delivery of training, and (2) the impact of training on participant's knowledge, skills and abilities.

Information about the organization and delivery of training will be collected from trainers and staff, hence there is no respondent burden. All training participants will be asked to complete a brief feedback form at the end of the training session. CMHS anticipates funding 10 education sites for the Mental Health Care Provider Education in HIV/AIDS Program. The annual burden estimates for this activity are shown below:

Form	Responses per respondent	Estimated number of respondents × 10 sites)	Hours per response	Total hours
Session Report Form	1	60 × 10 = 600	0.080	48
Participant Feedback Form (General Education)	1	500 × 10 = 5000	0.167	835
Neuropsychiatric Participant Feedback Form	1	160 × 10 = 1600	0.167	267
Non Physician Neuropsychiatric Participant Feedback Form	1	240 × 10 = 2400	0.167	401
Adherence Participant Feedback Form	1	100 × 10 = 1000	0.167	167
Ethics Participant Feedback Form	1	200 × 10 = 2000	0.167	125
Total	12,600	1,843

Proposed Project: 2007 National Survey of Mental Health Treatment Facilities (NSMHTF) (OMB No. 0930-0119)—Revision

The Substance Abuse and Mental Health Services Administration's (SAMHSA) Center for Mental Health Services (CMHS) will conduct a 2007 NSMHTF. This national survey represents a re-design of the biennial Survey of Mental Health Organizations (SMHO) last conducted in 2004 under OMB No. 0930-0119. Instead of surveying each mental health organization as a whole, the 2007 NSMHTF will survey all of the mental health treatment locations. These

separate mental health service locations are called facilities, in contrast to mental health organizations, which may include multiple facilities (service locations). This survey will be (a) a 100 percent enumeration of all known mental health treatment facilities nationwide, (b) more consumer-oriented in describing services available at each facility location, and (c) patterned after SAMHSA's Office of Applied Studies National Survey of Substance Abuse Treatment Services (OMB No. 0930-0106).

The 2007 NSMHTF will utilize one questionnaire for all mental health treatment facility types including hospitals, residential treatment centers and outpatient clinics. The information collected will include intake telephone numbers for services, types of services offered and acceptable forms of payment, emergency hotline numbers, facility caseload, and facility bed counts, if applicable. All treatment facilities will be contacted by telephone prior to the mailing to verify their eligibility, and facility type.

The resulting database will be used to provide both state and national estimates of facility types and their patient caseloads. Information from the 2007 survey will also be used to update the National Mental Health Information Center's facility locator for consumers. In addition, data derived from the

survey will be published by CMHS in *Data Highlights, in Mental Health, United States*, and in professional journals such as *Psychiatric Services*

and the *American Journal of Psychiatry*. The publication *Mental Health, United States* is used by the general public, State governments, the U.S. Congress,

university researchers, and other health care professionals. The following Table summarizes the estimated response burden for the survey.

ESTIMATED TOTAL RESPONSE BURDEN FOR THE 2007 NSMHTF

Facility type	Number of respondents	Responses per respondent	Average hours per response	Total hour burden
Public psychiatric hospitals	502	1	1	502
Private Psychiatric Hospitals	557	1	1	557
General Hospitals	1,599	1	1	1,599
Residential Treatment Centers for SED	1,456	1	1	1,456
Outpatient Clinics	3,493	1	1	3,493
Multi-Setting Facilities	5,264	1	1	5,264
Total Facilities	12,871	1	1	12,871
