DATES: Readers should note that the Secretary of Agriculture and the Secretary of the Interior are the responsible officials for this proposed action. Also no administrative review ("protest") through the BLM will be available on the Final Supplement under 43 CFR 1610.5-2. Because there is no administrative review of the decision and because of the review period described above, the ROD(s) will not be signed until at least 30 days after the Environmental Protection Agency Notice of Availability for the Final Supplement appears in the **Federal Register** (see 40 CFR 1506.10(b)).

SUPPLEMENTARY INFORMATION: In January 2004 the Agencies released a Final Supplemental Environmental Impact Statement (2004 FSEIS) analyzing a proposal to remove the Survey and

Manage Mitigation Measure from the Northwest Forest Plan. The Agencies subsequently released a ROD adopting that proposal. In August 2005 the U.S. District Court of the Western District of Washington found the 2004 FSEIS failed to: (1) "analyze potential impacts to Survey and Manage species if they are not added to or are removed from the FS's and BLM's respective programs for special status species;" (2) "provide a thorough analysis of their assumption that the late-successional reserves would adequately protect species that the Survey and Manage standard was introduced to protect, particularly in light of their previous positions in earlier environmental impact statements;" and (3) "disclose and analyze flaws in their methodology for calculating the acreage in need of hazardous fuel treatments. Part of the cost analysis was similarly flawed because it relied on the acreage in need of hazardous fuel treatments in calculating the cost of the Survey and Manage standard." The Final Supplement provides the additional information and analysis to address the deficiencies noted by the court, and it provides and analyzes new information available since publication of the 2004 FSEIS. In November 2006, in a different court case, the U.S. Court of Appeals for the Ninth Circuit found the Agencies' 2001 decision to change the category of the red tree vole and the subsequent 2003 removal of red tree vole from Survey and Manage following processes described in the Survey and Manage Standards and Guidelines constituted a BLM plan amendment that should have followed NEPA and applicable planning processes. To address this decision and its potential implications on other 2001 to 2003 species removals and category changes, the Final Supplement includes another no-action alternative that considers all species on Survey and Manage, and their assigned categories, when the previous Survey and Manage Record of Decision was signed in January 2001.

No sooner than 30 days following release of the Final Supplement, the Agencies will prepare a new ROD. A decision to select one of the action alternatives would amend the management direction in all 28 FS and

BLM land and resource management plans in the Northwest Forest Plan area.

Director of Resource Planning & Monitoring, Region 6, USDA Forest Service.

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Applications and Reporting Requirements for Small Takes of Marine Mammals by Specified Activities Under the Marine Mammal Protection Act.

Form Number(s): None.

OMB Approval Number: 0648-0151.

Type of Request: Regular submission.

Burden Hours: 20,456.

Number of Respondents: 72.

Average Hours Per Response: Petition for Regulations, 483 hours; simple LOA application, 3 hours; simple LOA report, 20 hours; complex LOA application, 120 hours; complex LOA report, 285 hours; simple IHA application, 160 hours; simple IHA report, 120 hours; complex IHA application, 285 hours; complex IHA report, 325 hours.

Needs and Uses: The "taking" by harassment, injury, or mortality of marine mammals is prohibited by the Marine Mammal Protection Act (MMPA) unless exempted or authorized by a permit. The small-take program authorized the taking of marine mammals incidental to maritime activities (oil industry, shipping). It is the responsibility of the activity to determine if it might have a "taking" and, if it does, to apply for an authorization. Applications are necessary for NMFS to know that an authorization is needed and to determine whether authorization can be made under the MMPA. The reporting requirements are mandated by the MMPA and are necessary to ensure that determinations made in regard to the impact on marine mammals are valid.

Affected Public: Business or other for-profit organizations; not-for-profit
