What Information Is EPA Particularly Interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

What Should I Consider When I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

- Explain your views as clearly as possible and provide specific examples.
- Describe any assumptions that you used.
- Provide copies of technical information/data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.

5. Offer alternative ways to improve the collection activity.

6. Make sure to submit your comments by the deadline identified under **DATES**.

7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

What Information Collection Activity or ICR Does This Apply to?

Affected entities: Entities potentially affected by this action are public wastewater treatment plants, municipalities, industries, universities, manufacturing sites and States.

Title: Questionnaire for Nominees for the Annual National Clean Water Act Recognition Awards Program.

ICR numbers: EPA ICR No. 1287.09, OMB Control No. 2040-0101.

ICR status: This ICR is currently scheduled to expire on September 30, 2007. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This ICR requests reapproval to collect data from EPA's National Clean Water Act Recognition Awards nominees. The awards are for the following program categories: Operations and Maintenance (O&M) Excellence, Biosolids (Biosolids) Management Excellence, Combined Sewer Overflow Control (CSO) Program Excellence and Storm Water (SW) Management Excellence.

In 1985, EPA established the Operations and Maintenance (O&M) awards program to provide a positive incentive for compliance with the National Pollutant Discharge Elimination System. Because of the successes of the O&M Awards program, in 1988 EPA established the Beneficial Biosolids Use awards (formerly Sludge awards). In 1989, the Pretreatment awards were added. In 1990, EPA established the Combined Sewer Overflow (CSO) and Storm Water (SW)

Management awards programs. The questionnaire provides the mechanism for the applicant to demonstrate outstanding and innovative wastewater management practices. The Pretreatment awards program is covered by ICR (OMB Control No. 2040-0009, EPA ICR No. 0002.12), approved through September 30, 2007. A framework to implement the awards recognition program is at 40 CFR part 105.

The respondent, *i.e.*, those applying for the award program, will read the instructions for completing the questionnaire. The respondent will use existing files, planning and progress reports, and institutional memory to complete the questionnaire. Based on the instructions provided with the questionnaire, the respondent will compile the requested information. The requested design and operating information should be readily available from wastewater treatment facility or pollution abatement program operating records. The data collection will include flow, permit, operating and environmental data.

The information collection will be used by the respective awards program in the Office of Water, Office of Wastewater Management to evaluate and determine which pollution abatement achievements should be recognized. Based on the collection, national panels will evaluate the nominee's efforts and recommend finalists. As currently structured, the O&M awards program has nine sub-categories to recognize municipal achievements based on plant flows and treatment level. The Biosolids awards program has four sub-categories which recognize municipal biosolids operations, technology and research achievements, and public acceptance. The CSO awards program has one sub-category which recognizes municipal programs, and the SW awards program has two sub-categories which recognize municipal and industrial programs. Regions and States may also have recognition awards programs and are included in these burden estimates. National second place category winners may also be recognized. Additionally, nominated activities may sometimes receive an honorable mention or special award. The National Clean Water Act Recognition Awards are presented annually at an EPA ceremony.

Burden Statement: The total number of respondents is estimated to be 145, including 100 for the O&M program, 25 for the Biosolids program, 10 for the CSO program, and 10 for the SW program. The responses are collected once annually. The respondents

reporting burden of 8 person hours per response is estimated to be 1,160 hours and a cost of \$49,458. The States' review burden of 6 person hours per response is 870 hours and a cost of \$37,459. Total estimated burden for this collection is 2,030 hours and \$86,917. The public reporting burden for respondents is estimated to average 8 hours per response per year. For State respondents, the reporting burden is estimated to average 6 hours per response per year. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and use technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose information. The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 195 (145 applicants respondents and 50 states).

Frequency of response: once annually.

Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 2,030 hours.

Estimated total annual costs: \$86,917. This includes an estimated burden cost of \$86,917 and an estimated cost of \$0 for capital investment or maintenance and operational costs.

Changes in the Estimates: There is no change in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. EPA has not modified the requirements that were included in the previous ICR.

Dated: June 27, 2007.
