The designations and titles of the above test standards were current at the time of the preparation of this notice.

OSHA's recognition of MET, or any NRTL, for a particular test standard is limited to equipment or materials (i.e., products) for which OSHA standards require third-party testing and certification before use in the workplace. Consequently, if a test standard also covers any product(s) for which OSHA does not require such testing and certification, an NRTL's scope of recognition does not include that product(s).

A test standard listed above may also be approved as an American National Standard by the American National Standards Institute (ANSI). However, for convenience, we use the designation of the standards developing organization for the standard as opposed to the ANSI designation. Under our procedures, any NRTL recognized for an ANSI-approved test standard may use either the latest proprietary version of the test standard or the latest ANSI version of that standard. You may contact ANSI to find out whether or not a test standard is currently ANSI-approved.

Preliminary Finding on the Application

MET has submitted an acceptable request for expansion of its recognition as an NRTL. In connection with this request, OSHA did not perform an on-site review of MET's NRTL testing facilities. However, NRTL Program assessment staff reviewed information pertinent to the request and recommended that MET's recognition be expanded to include the additional test standards listed above (see Exhibit 41-2). Our review of the application file, the assessor's recommendation, and other pertinent documents indicate that

MET can meet the requirements, as prescribed by 29 CFR 1910.7, for expansion of its scope to include the additional test standards listed above. This preliminary finding does not constitute an interim or temporary approval of the application.

OSHA welcomes public comments, in sufficient detail, as to whether MET has met the requirements of 29 CFR 1910.7 for expansion of its recognition as a Nationally Recognized Testing Laboratory. Your comments should consist of pertinent written documents and exhibits. Should you need more time to comment, you must request it in writing, including reasons for the request. OSHA must receive your written request for extension at the address provided above no later than the last date for comments. OSHA will limit any extension to 30 days, unless the requester justifies a longer period. We may deny a request for extension if it is not adequately justified. You may obtain or review copies of MET's requests, the assessor's recommendation, other pertinent documents, and all submitted comments, as received, by contacting the Docket Office, Room N-2625, Occupational Safety and Health Administration, U.S. Department of Labor, at the above address. Docket No. OSHA-2006-0028 (formerly, NRTL1-88) contains all materials in the record concerning MET's application.

The NRTL Program staff will review all timely comments and, after resolution of issues raised by these comments, will recommend whether to grant MET's expansion request. The Assistant Secretary will make the final decision on granting the expansion and, in making this decision, may undertake other proceedings that are prescribed in Appendix A to 29 CFR 1910.7. OSHA will publish a public notice of this final decision in the **Federal Register**.

Signed at Washington, DC, this 25th day of June, 2007.

Edwin G. Foulke, Jr.,

Assistant Secretary for Occupational Safety and Health.

NUCLEAR REGULATORY COMMISSION

Draft Regulatory Guide: Issuance, Availability

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft Regulatory Guide: Issuance, Availability.

FOR FURTHER INFORMATION CONTACT:

Bonnie A. Schnetzler, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Telephone: (301) 415-7883 or e-mail BAS5@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) has issued for public comment a draft guide in the agency's Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide, entitled "Reporting of Safeguards Events," is temporarily identified by its task number, DG-5019, which should be mentioned in all related correspondence.

This draft regulatory guide provides an approach acceptable to the NRC staff for use by licensees for reporting of security events. In 10 CFR part 73, "Physical Protection of Plants and Materials," Section 73.71 requires licensees to report to the Operations Center of the Nuclear Regulatory Commission (NRC) or to record in a log certain security events. Appendix G, "Reportable Safeguards Events," to 10

CFR part 73 (Appendix G) describes reporting requirements in detail. Appendix E to 10 CFR part 50 (Appendix E), "Emergency Planning and Preparedness for Production and Utilization Facilities," provides more detailed information for emergency planning and preparedness. The events to be reported or recorded are those that represent actual or potential threats, suspicious activities, external attacks, or internal tampering with equipment that threaten or affect safe plant operations or effective security operations. The events to be recorded are those that affect or lessen the effectiveness of the security systems, components, and procedures as established by security regulations and the licensee's approved security plans.

Proposed revisions to 10 CFR 73.71 included two new requirements for power reactors: (1) The reporting within 15 minutes after discovery of an actual or imminent threat against a facility, and (2) the reporting of suspicious surveillance activities or attempts at access, both of which are addressed in this guide.

II. Further Information

The NRC staff is soliciting comments on Draft Regulatory Guide DG-5019. Comments may be accompanied by relevant information or supporting data, and should mention DG-5019 in the subject line.
