C. What additional supporting data or documentation do I need to provide with my comments?

The EPA is soliciting comment on the new monitoring data and on all aspects of the procedures and assumptions used in the impacts analysis. We are specifically requesting data and comment on the following items:

- Additional monitoring data for open-ended lines, particularly any data that show open-ended lines in heavy liquid service that have been found to leak at greater than 500 ppm.
- Data on the percentage of open-ended lines in heavy liquid service.
- The appropriateness of using correlation equations for connectors and flanges to estimate emissions from improperly capped and plugged open-ended lines.
- Data on how often open-ended lines in different applications are opened.
- A description of the types of activities needed to repair leaking open-ended lines, and estimates of the time needed to perform such repairs.

Timely comments on these subjects will be taken into account in developing the final impacts analysis and in EPA's final action on the proposed amendments.

Withdrawal of Federal Marine Aquatic Life Water Quality Criteria for Toxic Pollutants Applicable to Washington State

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to amend the Federal regulations to withdraw its 1992 federally promulgated marine copper and cyanide chronic aquatic life water quality criteria for Washington State, thereby enabling Washington to implement its current EPA-approved chronic numeric criteria for copper and cyanide that cover all marine waters of the State.

In 1992, EPA promulgated Federal regulations establishing water quality criteria for priority toxic pollutants for 12 States, including Washington, and two Territories that had not fully complied with the Clean Water Act (CWA). These regulations are known as the "National Toxics Rule" or "NTR". On November 18, 1997, Washington

adopted revised chronic marine aquatic life criteria for copper and cyanide, the only two marine aquatic life priority toxic pollutants in the NTR applicable to Washington. These revisions included a chronic marine aquatic life water quality criterion for copper for all marine waters and a chronic site-specific cyanide criterion for the Puget Sound. EPA approved these criteria on February 6, 1998. On August 1, 2003, Washington adopted revisions to its water quality standards, including a chronic marine criterion for cyanide for all marine waters except the Puget Sound. EPA approved this criterion on May 23, 2007. Since Washington now has marine copper and cyanide chronic aquatic life criteria effective under the CWA that EPA has approved as protective of Washington's designated uses, EPA is proposing to amend the NTR to withdraw the federally promulgated criteria.

Federal Emergency Management Agency

44 CFR Part 67

[Docket No. FEMA-B-7723]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are requested on the proposed Base (1% annual chance) Flood Elevations (BFEs) and proposed BFEs modifications for the communities listed below. The BFEs are the basis for the floodplain management measures that the community is required either to adopt or to show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The comment period is ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: The proposed BFEs for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the table below.

FOR FURTHER INFORMATION CONTACT: William R. Blanton, Jr., Engineering Management Section, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646-3151.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) proposes to make determinations of BFEs and modified BFEs for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State or regional entities. These proposed elevations are used to meet
