What Information Is EPA Particularly Interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (iii) Enhance the quality, utility, and clarity of the information to be collected; and
- (iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

What Should I Consider When I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Offer alternative ways to improve the collection activity.
6. Make sure to submit your comments by the deadline identified under **DATES**.
7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

What Information Collection Activity or ICR Does This Apply to?

Affected entities: Entities potentially affected by this action include recipients of EPA discretionary/project assistance agreements (i.e., grants and cooperative agreements) that perform training and/or education and outreach.

Title: Performance Measurement Reporting for Training and Education/Outreach.

EPA ICR No.: 2255.01.

ICR status: This ICR is for a new information collection activity. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: EPA is developing some generic reporting tools that will supplement the existing performance reports submitted by grant recipients under 40 CFR Parts 30 and 31. The new reporting tools will be designed to collect performance measurement information on two types of activities performed by grantees: Training and education/outreach. Specifically, EPA is creating a "master list" of generic

questions and reporting templates, and will make them available to the EPA programs and grant recipients (e.g., on the EPA web site). The questions will be designed to measure the extent to which the grantees are achieving the short-term and intermediate outcomes stated in their work plans for training and/or education/outreach (e.g., the questions will measure changes in trainees' awareness, understanding, and potential or actual changes in behavior). The questions and templates will be flexible enough for use by any of the EPA programs. A grant recipient could review the master list, select the questions appropriate for its needs, and assemble them onto a reporting template. After receiving approval to use the collection instrument, the grant recipient could provide the instrument to its training participants or other audience members to complete. The grantee could then collect, summarize, and report the data to EPA. These reporting tools will be intended specifically for use under the Agency's discretionary/project grants. Use of the forms will not be required, but used at the discretion of the responsible program.

EPA intends to create a generic ICR that would address its reporting tools. Upon OMB approval of the generic ICR, EPA program offices and their grant recipients would be able to modify the forms narrowly for their specific needs and re-submit the revised instruments and supporting material for expedited OMB approval encompassing a 20-day turn-around timeframe.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to range from five minutes to 1.5 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated average annual number of grants affected: between 240 and 480.

Estimated annual frequency of response: Quarterly or less often.

Estimated annual average number of responses for each grant: 4.

Estimated total annual respondent burden hours: 12,820 hours.

Estimated total annual respondent costs: \$359,149. This includes an estimated labor cost of \$359,149 and \$0 for capital investment or maintenance and operational costs.

What Is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: July 13, 2007.

Acting Director of the Office of Grants and Debarment.
