ADDRESSES: The permit and related documents are available for review upon written request or by appointment in the following offices:

Permits, Conservation and Education Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301)713-2289; fax (301)427-2521; and Alaska Region, NMFS, P.O. Box 21668, Juneau, AK 99802-1668; phone (907)586-7221; fax (907)586-7249.

FOR FURTHER INFORMATION CONTACT: Jennifer Skidmore or Amy Sloan, (301)713-2289.

SUPPLEMENTARY INFORMATION: On April 27, 2007, notice was published in the **Federal Register** (72 FR 20994) that a request for a scientific research permit to the marine mammal species identified above had been submitted by the above-named organization. The requested permit has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

The tissues collected/acquired by the North Slope Borough Department of Wildlife Management under this permit

would be utilized in a variety of health-related analyses, including (but not limited to): tissue histology, contaminants analyses (elemental analyses, PAH/organochlorine analyses etc.), infectious disease research (culture, PCR analyses), parasitology studies and stable isotope work. Additionally, tissues would be collected to augment the Alaskan Marine Mammal Tissue Archival Project (AMMTAP). No animals would be killed for the purpose of providing samples under this permit. Locations of collections would be from the Northwest Arctic Borough (St. Lawrence Island, Diomedea, Wales and Kivalina) and the North Slope Borough, Alaska. This effort would provide critical baseline data and would be part of a long-term monitoring project being undertaken by the North Slope Borough Department of Wildlife Management in response to public concerns about the safety and health of their subsistence species. This permit has been issued for a period of 5 years.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), a final determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Issuance of this permit, as required by the ESA, was based on a finding that such permit: (1) was applied for in good faith; (2) will not operate to the disadvantage of such endangered species; and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: July 18, 2007.

P. Michael Payne,

Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service.

SUPPLEMENTARY INFORMATION:

I. Abstract

One of the goals of the United States Patent and Trademark Office Strategic Plan is to optimize quality. The Office holds continuously improving quality as one of its guiding principles in the Agency's Strategic Plan framework. As such, the Office plans to consider appropriate measures of patent quality, including the performance targets, with the goal of a balance between the desire for assured high quality results and resource limitations for the initial examination process. Achieving widely accepted quality measures and processes will require that all stakeholders engage in the effort.

To promote greater consistency and credibility for the measurements of quality by the Office, the USPTO is proposing to engage the patent community to assist in the development of an objective set of review criteria and processes that could be applied across all selected components of the current USPTO examination process. The Office will be looking to determine what measures should be used to assess examination quality, how these measures should be reported and what meaningful quality targets should be the goals of an initial system of patent examination. This engagement will take place in the form of a survey, entitled the External Quality Metrics Survey. Through this survey the patent community will assist the USPTO in meeting its strategic goals, including efforts to optimize the patent process, in a clearly and concisely articulated and documented format.

The External Quality Metrics Survey project will be designed to query from
