II. Background

A. What Action is the Agency Taking?

EPA is releasing for public comment its ecological risk assessment and related documents for acrolein, an aquatic herbicide and biocide, and soliciting public comment on risk management ideas or proposals. The human health risk assessment will be released later. Acrolein is primarily used in irrigation canals and reservoirs to treat aquatic weeds, such as pondweed. Acrolein's secondary use is in oil fields, as a biocide to remove bacteria during petroleum production. EPA developed the ecological risk assessment and risk characterization for acrolein through a modified version of its public process for making pesticide reregistration eligibility and tolerance reassessment decisions. Through these programs, EPA is ensuring that pesticides meet current standards under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended by the Food Quality Protection Act of 1996 (FQPA).

Through this notice, EPA also is providing an opportunity for interested parties to provide risk management proposals or otherwise comment on ecological risk management for acrolein. Risks of concern associated with the use of acrolein are: acute and chronic risk to freshwater fish and estuarine/marine fish and invertebrates, acute and chronic risk to mammals, and acute risk to birds and aquatic plants. In targeting these risks of concern, the Agency solicits information on effective and practical risk reduction measures for ecological risks of concern from the irrigation canal use.

EPA seeks to achieve environmental justice, the fair treatment and

meaningful involvement of all people, regardless of race, color, national origin, or income, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical, unusually high exposure to acrolein, compared to the general population.

All comments should be submitted using the methods in **ADDRESSES**, and must be received by EPA on or before the closing date. Comments will become part of the Agency Docket for acrolein. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments.

B. What is the Agency's Authority for Taking this Action?

Section 4(g)(2) of FIFRA as amended directs that, after submission of all data concerning a pesticide active ingredient, "the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration," before calling in product-specific data on individual end-use products and either reregistering products or taking other "appropriate regulatory action."

Section 408(q) of the FFDCA, 21 U.S.C. 346a(q), requires EPA to review tolerances and exemptions for pesticide residues in effect as of August 2, 1996, to determine whether the tolerance or exemption meets the requirements of section 408(b)(2) or (c)(2) of FFDCA. This review was to be completed by August 3, 2006.
