FOR FURTHER INFORMATION CONTACT: Joe Incardine at the Utah State Office, Bureau of Land Management, 440 West 200 South, Suite 500, Salt Lake City, Utah 84101; by phone: (801) 539-4118; or by e-mail: Joe_Incardine@blm.gov.

SUPPLEMENTARY INFORMATION: The EIS will assess the potential impacts of granting a right-of-way (ROW) authorizing subsequent construction, installation, and operation of a liquid petroleum products pipeline and facilities in Davis, Salt Lake, Tooele, Juab, Millard, Beaver, Iron, and Washington Counties in Utah and Lincoln and Clark Counties in Nevada to increase the capacity and improve the efficiency of the fuel delivery system into southern Utah and the Las Vegas, Nevada, area. The pipeline will be available to accept shipments of refined products from multiple refineries in the Salt Lake City, Utah, area, as well as refineries in Wyoming and Montana.

Summary of the Proposed Project

UNEV, LLC is seeking a ROW grant to undertake the following activities:

- Install 400 miles of 12-inch-diameter petroleum products line from Woods Cross, Utah, to Las Vegas, Nevada.
- Construct an inlet pumping station, one additional pumping station about midway along the line, and pressure reduction stations and terminals at Cedar City and Las Vegas.
- Install mainline valves at or near the existing valve locations on the existing Kern River pipeline, where feasible. New valves would be installed on the pipeline to reduce the distance between existing valves for operational and maintenance reasons.
- Install scraper stations, used for launching and receiving the cleaning and inspection "pigs." New electrical service will be installed at each station.
- Install cathodic protection test stations at approximately 1-mile intervals to maintain and monitor the mechanical integrity of the pipeline.
- Install visible pipeline markers at intervals to mark the approximate location of the pipeline centerline.

The EIS Process

NEPA requires the BLM to take into account the environmental impacts of its actions. The BLM will use the EIS to consider the environmental impacts that could result if a ROW grant for the proposed action is issued pursuant to Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185). The main goal of the scoping process is to

focus the analysis in the EIS on the important environmental issues. With this NOI, the BLM is requesting public comments on the scope of the issues to be addressed in the EIS. All comments received will be considered during preparation of the EIS.

The EIS will discuss direct, indirect, and cumulative impacts that could occur as a result of the construction, operation, maintenance, and abandonment of the proposed project under these general headings:

- Geology and Minerals
- Soils
- Water Resources
- Biological Resources
- Threatened and Endangered Species
- Rangeland Resources
- Wilderness, Wilderness Study Areas, and Areas of Critical Environmental Concern
- Land Use and Access
- Recreation and Visual Resources
- Environmental Justice
- Socioeconomics
- Cultural and Paleontological Resources
- Native American Concerns
- Air Quality and Noise
- Hazardous and Solid Waste
- Transportation
- Public Safety

The BLM will also evaluate possible alternatives to the proposed project or portions of the project, and make recommendations on how to lessen or avoid impacts on affected resources.

Analysis of the issues will be included in a draft EIS. The draft EIS will be mailed to affected federal, state, and local government agencies; elected officials; landowners; environmental and public interest groups; Indian tribes and regional Native American organizations; commenters; and other interested parties. A 45-day comment period will be allotted for review of the draft EIS. The BLM will consider all comments on the draft EIS and revise the document, as necessary, before issuing a final EIS. To ensure that your comments are considered, please follow the instructions in the Public Participation section of this NOI.

This EIS may also analyze a plan amendment for the Pony Express Resource Management Plan, should there be federal lands in the proposed action or alternatives not within a designated utility corridor.

Public Participation

Public scoping meetings are planned at five locations. The meetings will provide the public an opportunity to present comments or issues for consideration in the EIS. The meetings

will be held in an "open house format" beginning at 5 p.m. and ending at 8 p.m. Specific dates and locations for the public scoping meetings will be provided as noted above in the **DATES** section.

Comments concerning the Proposed Action and EIS should address relevant issues, feasible alternatives, possible mitigation, and information having a bearing on the Proposed Action.

Your response is important and will be considered in the EIS process. If you respond, the BLM will keep you informed of the availability of environmental documents that address impacts that might occur from this proposal.

Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Selma Sierra,
State Director.
