**SUPPLEMENTARY INFORMATION:** USWEX is an advanced Anti-Submarine Warfare Exercise proposed to be conducted by U.S. Navy Carrier Strike Groups (CSGs) and Expeditionary Strike Groups (ESGs) while in transit from the west coast of the United States to the western Pacific Ocean using existing operating areas and ranges within the Hawaii Range Complex. As identified in the USWEX Programmatic EA/OEA, the Proposed Action is to conduct USWEXs in the Hawaii Range Complex for deploying west coast-based CSGs and ESGs, and Hawaii homeported ships and submarines. Training events similar to those that comprise a USWEX are currently being conducted individually. USWEX is a combination of training events that results in a sea control/power projection fleet exercise that is required in order to meet training objectives for deploying or deployable CSGs and ESGs.

Anti-Submarine Warfare training conducted during a USWEX utilizes ships, submarines, aircraft, non-explosive exercise weapons, and other training systems and devices. During a typical USWEX, embarked aircraft will also be conducting training prior to deployment to the western Pacific Ocean. Fixed-wing aircraft will fly sorties to Pohakuloa Training Area on the Island of Hawaii, and rotary aircraft will fly sorties to Kaula located off the coast of Kauai. Aircraft will utilize these live ranges to drop live or inert rounds. During an ESG USWEX, amphibious forces could utilize the beaches at Pacific Missile Range Facility or at Marine Corps Training Area Bellows to conduct amphibious landings. The EA/OEA includes an analysis of three Alternatives. Alternative 1 analyzes four CSG USWEXs and two ESG USWEXs per year occurring in the Hawaii Range

Complex. Alternative 2 analyzes three CSG USWEXs and one ESG USWEX per year occurring in the Hawaii Range Complex. Under the No Action Alternative, individual training events that compose a USWEX would continue to occur; however, they would not be consolidated into a coordinated training event.

The analysis conducted in the USWEX Programmatic EA/OEA focused on the following resources: Airspace, biological resources, cultural resources, land use, noise, and safety and health. Impacts to biological resources will not be significant. The EA/OEA analyzes mid-frequency active sonar use associated with the USWEX and documents an acoustic exposure effects-analysis on marine mammals that may be affected by the USWEX training events and use of mid-frequency active sonar. There are no predicted marine mammal sonar exposures that would result in injury or mortality. The DON consulted with the National Marine Fisheries Service and received a biological opinion and an incidental take statement under Section 7 of the Endangered Species Act that determined the Proposed Action would not result in jeopardy to any endangered species. No new special use airspace proposal or any modification to the existing special use airspace is proposed. Impacts to cultural resources, land use, noise, and safety and health are not anticipated.

Based on the information gathered during preparation of the USWEX Programmatic EA/OEA, the DoD finds that up to six USWEX per year under Alternative 1 within the Hawaii Range Complex will not significantly impact the environment and, therefore, an EIS is not required for implementing Alternative 1.
