[Project No. 459-176]

Union Electric Company, dba AmerenUE; Notice of Availability of Environmental Assessment

August 31, 2007.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR Part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects has reviewed an application for non-project use of project lands and waters at the Osage Project (FERC No. 459) and has prepared an Environmental Assessment (EA) for the proposed non-project use. The non-project use of project lands and waters

is located at mile marker 3.5 of the Osage Arm of the Lake of the Ozarks, at the mouth of Jackson Branch Cove. The Osage Project is located in Benton, Camden, Miller, and Morgan Counties, Missouri.

In the application, Union Electric Company, dba AmerenUE requests Commission approval to authorize Atlantis Island LLC to construct 17 docks with 374 slips at the Atlantis Island condominiums. The EA contains Commission staff's analysis of the probable environmental impacts of the proposal and concludes that approving the licensee's application, with staff's recommended environmental measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The EA is attached to a Commission order titled "Order Modifying and Approving Non-Project Use of Project Lands and Waters," which was issued August 23, 2007, and is available for review and reproduction at the Commission's Public Reference Room, located at 888 First Street, NE., Room 2A, Washington, DC 20426. The EA may also be viewed on the Commission's Web site at <http://www.ferc.gov> using the "elibrary" link. that resource agency. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

k. *Description of Request:* Progress Energy Carolinas is requesting a temporary variance of the requirements for lake level, dissolved oxygen and minimum flow. Due to persistent drought conditions in the project area and the need to maintain a minimum reservoir elevation to prevent erosion of dioxin laden lake sediments, Progress Energy requests that it be allowed to reduce flow releases below the minimum flow requirement of 100 cubic feet per second if the Walters Lake reaches an elevation of 2234 feet, and to stop all releases from the powerhouse if Walters Lake reaches elevation 2232 feet. Only flows from Big Creek, the 12 mile bypassed reach of the Pigeon River, and other small tributaries will provide flow. Progress Energy proposes to resume minimum flow releases when Walters Lake is at and above an elevation of 2236 feet. The licensee proposes to limit complete shutdown of flow releases to periods not to exceed 7 days at elevation above 2232 feet. Progress Energy has consulted with Tennessee Wildlife Resources Agency and the North Carolina Department of Environment and Natural Resources. These agencies concur with the request. On August 31, 2007, the Commission granted the licensee's requests, but reserved authority to require changes in project operation based upon comments received from this notice.

l. *Location of the Application:* The filing is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street, NE., Room 2A, Washington, DC 20426 or by calling (202) 502-8371, or by calling (202) 502-8371.
