

environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States.

EPA has determined that this proposed rule will not have disproportionately high and adverse human health or environmental effects on minority or low-income populations because it does not affect the level of protection provided to human health or the environment. The controls in place for laboratory and analytical uses provide adequate assurance that very little, if any, environmental damage will result from the handling and disposal of the small amounts of class I ODS used in such applications. Furthermore, the 2006 CTOC Assessment Report shows a general decrease from 2002 through 2005 in the amount of phased-out class I substances being supplied to laboratories under this exemption.

- b. In laboratory toxicological studies;
- c. To compare the efficacy of methyl bromide and its alternatives inside a laboratory; and
- d. As a laboratory agent which is destroyed in a chemical reaction in the manner of feedstock.
