

Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This ICR requests continuing approval to collect data from EPA's National Clean Water Act Recognition Awards nominees in order to provide a positive incentive for compliance with the Clean Water Act. The awards are for the following program categories: Operations and Maintenance (O&M) Excellence, Biosolids (Biosolids) Management Excellence, Combined Sewer Overflow Control (CSO) Program Excellence and Storm Water (SW) Management Excellence.

The questionnaire covered by this ICR provides the mechanism for the applicant to demonstrate outstanding and innovative wastewater management practices. A framework to implement the awards recognition program is at 40 CFR part 105.

The information collection will be used by the respective awards program in the Office of Water, Office of Wastewater Management to evaluate and determine which pollution abatement achievements should be recognized. Based on the collection, national panels will evaluate the nominee's efforts and recommend finalists. The National Clean Water Act Recognition Awards are presented annually at an EPA ceremony.

Submission of information on behalf of the respondents is voluntary. No confidential information is requested.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 7 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and

maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Public wastewater treatment plants, municipalities, States and manufacturing sites.

Estimated Number of Respondents: 195 (145 applicants respondents and 50 states).

Frequency of Response: Annually.

Estimated Total Annual Hour Burden: 2,030 hours.

Estimated Total Annual Cost: \$85,738 includes \$0 annualized capital or O&M costs.

Changes in the Estimates: There is no change in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB.

Dated: September 13, 2007.

Title: NSPS for Electric Utility Steam Generating Units (Renewal).

ICR Numbers: EPA ICR Number 1053.09, OMB Control Number 2060-0023.

ICR Status: This ICR is scheduled to expire on October 31, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The respondents to this information collection are owners or operators of electric utility steam generating units subject to the New Source Performance Standards (NSPS) subpart Da. These regulations apply to electric utility steam generating units which are capable of combusting more than 73 megawatts (MW) heat input of fossil fuel commencing construction, modification, or reconstruction after the date of proposal. This information will be used by enforcement agencies to verify that sources subject to the standard are meeting the emission reductions mandated by the Clean Air Act.

Owners/operators of electric utility steam generating facilities are required to submit one-time notification of construction/reconstruction, anticipated and actual startup, initial performance test, physical or operational changes, and demonstration of a continuous monitoring system. Respondents are also required to submit a report on initial performance test results, monitoring results, and excess emissions. Records must be maintained of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring

system is inoperative. Semiannual and quarterly reports are also required. These notifications, reports, and records are essential in determining compliance; and are required, in general, of all sources subject to NSPS.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least two years following the date of such measurements, maintenance reports and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 60, subpart Da as authorized in section 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Number for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 96 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Electric utility steam generating units.

Estimated Number of Respondents: 677.

Frequency of Response: Initially, quarterly and semiannually.

Estimated Total Annual Hour Burden: 160,839.

Estimated Total Annual Cost: \$26,675,248, which includes \$2,200,000 annualized Capital Startup costs,

\$10,155,000 annualized Operating and Maintenance (O&M) costs, and \$14,320,248 annualized Labor costs.

Changes in the Estimates: There is an increase in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in the burden and cost estimates occurred because the active ICR did not account for managerial and clerical burden. Also, the hourly labor rate used was not consistent with the rates for that year which created a calculation error which this renewal has corrected. There is also an increase in the number of sources, thus contributing to the increase in burden hours and costs.
