Background

On December 13, 2006, FMCSA published a notice of receipt of Federal diabetes exemption applications from sixty-six individuals, and requested comments from the public (71 FR 74986). The public comment period closed on January 12, 2007 and no comments were received.

FMCSA has evaluated the eligibility of the sixty-six applicants and determined that granting the exemptions to these individuals would achieve a level of safety equivalent to, or greater than, the level that would be achieved by complying with the current regulation 49 CFR 391.41(b)(3).

Diabetes Mellitus and Driving Experience of the Applicants

The Agency established the current standard for diabetes in 1970 because several risk studies indicated that diabetic drivers had a higher rate of crash involvement than the general population. The diabetes rule provides that "A person is physically qualified to drive a commercial motor vehicle if that person has no established medical history or clinical diagnosis of diabetes mellitus currently requiring insulin for control" (49 CFR 391.41(b)(3)).

FMCSA established its diabetes exemption program, based on the Agency's July 2000 study entitled "A Report to Congress on the Feasibility of a Program To Qualify Individuals With Insulin-Treated Diabetes Mellitus To Operate in Interstate Commerce as Directed by the Transportation Act for the 21st Century." The report concluded that a safe and practicable protocol to allow some drivers with Insulin-Treated Diabetes Mellitus (ITDM) to operate CMVs is feasible. The 2003 notice in conjunction with the November 8, 2005 (70 FR 67777) **Federal Register** Notice provides the current protocol for allowing such drivers to operate CMVs in interstate commerce.

These sixty-six applicants have had ITDM over a range of 1 to 38 years. These applicants report no hypoglycemic reaction that resulted in loss of consciousness or seizure, that required the assistance of another person, or resulted in impaired cognitive function without warning symptoms in the past 5 years (with one year of stability following any such episode). In each case, an endocrinologist has verified that the driver has demonstrated willingness to properly monitor and manage their diabetes, received education related to diabetes management, and is on a stable insulin regimen. These drivers report no other disqualifying conditions,

including diabetes-related complications. Each meets the vision standard at 49 CFR 391.41(b)(10).

The qualifications and medical condition of each applicant were stated and discussed in detail in the December 13, 2006, **Federal Register** Notice (71 FR 74986). Because there were no docket comments on the specific merits or qualifications of any applicant, we have not repeated the individual profiles here.

Basis for Exemption Determination

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption from the diabetes standard in 49 CFR 391.41(b)(3) if the exemption is likely to achieve an equivalent or greater level of safety than would be achieved without the exemption. The exemption allows the applicants to operate CMVs in interstate commerce.

To evaluate the effect of these exemptions on safety, FMCSA considered medical reports about the applicants' ITDM and vision, and reviewed the treating endocrinologist's medical opinion related to the ability of the driver to safely operate a CMV while using insulin.

Consequently, FMCSA finds that exempting these applicants from the diabetes standard in 49 CFR 391.41(b)(3) is likely to achieve a level of safety equal to that existing without the exemption.

Conditions and Requirements

The terms and conditions of the exemption will be provided to the applicants in the exemption document and they include the following: (1) That each individual submit a quarterly monitoring checklist completed by the treating endocrinologist as well as an annual checklist with a comprehensive medical evaluation; (2) that each individual reports within 2 business days of occurrence, all episodes of severe hypoglycemia, significant complications, or inability to manage diabetes; also, any involvement in an accident or any other adverse event in a CMV or personal vehicle, whether or not they are related to an episode of hypoglycemia; (3) that each individual provide a copy of the ophthalmologist's or optometrist's report to the medical examiner at the time of the annual medical examination; and (4) that each individual provide a copy of the annual medical certification to the employer for retention in the driver's qualification file, or keep a copy in his/her driver's qualification file if he/she is self-employed. The driver must also have a copy of the certification when driving, for presentation to a duly authorized

Federal, State, or local enforcement official.

Discussion of Comments

FMCSA received no comments in this proceeding.

Conclusion

There were no comments to the docket, therefore, based upon its evaluation of the sixty-six exemption applications, FMCSA exempts, Louis T. Aceto, James D. Barton, Lawrence H. Behrens, Joel L. Bogenrief, Timothy W. Brogan, Eddy B. Brown, Kenneth E. Buck, Carolynnda Cain, Roy B. Carter, Bradley D. Case, Jonathan M. Cleek, David D. Collart, Donald L. Cowan, Michael J. Drake, Thomas D. Dyke, Glenn D. Folkers, Anthony L. Gentry, Howard L. Gocke, James S. Goldman, Carol D. Hardin, Jerry Hardy, Michael T. Hartley, David A. Heider, John A. Helm, John A. Herbert, Lester H. Hughes, Gayle E. Jones, Gerald P. Kargus, Christopher A. Knott, Norman L. Krietemeyer, Jerome A. Krupka, James A. Kunkel, Mark W. Lavorini, Jeffrey C. Link, Londell W. Luther, Harry E. Marsh, Joseph C. McMasters, George R. McMullen, James B. Morris, Bradley S. Mowdy, James R. Murphy, Ronald W. Nelson, Vincent A. Palumbo, Kent E. Pelkey, Keith E. Peterson, Victor C. Port, Lee F. Young from the ITDM standard in 49 CFR 391.41(b)(3), subject to the conditions listed under "Conditions and Requirements" above.

In accordance with 49 U.S.C. 31136(e) and 31315 each exemption will be valid for two years unless revoked earlier by FMCSA. The exemption will be revoked if: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315. If the exemption is still effective at the end of the 2-year period, the person may apply to FMCSA for a renewal under procedures in effect at that time.
