

Title 9, Chapter 1, Subchapter D, Parts 91 through 99. These regulations govern the importation of animals, birds and poultry, certain animal and poultry products, and animal germplasm. APHIS requires horses, ruminants, swine, and dogs imported into the United States from regions of the world where screwworm is known to exist to be inspected and, if necessary, treated for infestation with screwworm.

Screwworm is a pest native to tropical areas of South America, the Indian subcontinent, Southeast Asia, tropical and sub-Saharan Africa, and the Arabian Peninsula that causes extensive damage to livestock and other warm-blooded animals.

Need and Use of the Information: Horses, ruminants, swine, and dogs entering the United States from regions where screwworm is known to exist must be accompanied by a certificate, signed by a full-time salaried veterinary official of the exporting country, stating that these animals have been thoroughly examined, that they have been treated with ivermectin, that any visible wounds have been treated with camaphos, and the animals appear to be free of screwworm. This is necessary to prevent the introduction of screwworm into the United States. If the information were collected less frequently or not collected at all, it would significantly cripple APHIS ability to ensure that horses, ruminants, swine, and dogs imported into the United States are not carrying screwworm. Such a development would make a screwworm incursion much more likely, with economically damaging effects on the U.S. equine, cattle, and swine industries.

Description of Respondents: State, Local or Tribal Government.

Number of Respondents: 40.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 40.

Animal and Plant Health Inspection Service

Title: CSF—Importation of Pork and Pork Products and Live Swine from 4 Mexican States.

OMB Control Number: 0579–0230.

Summary of Collection: Title 21 U.S.C. 117, Animal Industry Act of 2000, authorizes the Secretary of Agriculture to take such measures as deemed proper to prevent the introduction or dissemination of any contagious or communicable disease of animals or live poultry from a foreign country into the United States or from one State to another. Disease prevention is the most effective method for maintaining a healthy animal

population and enhancing the Animal and Plant Health Inspection Service (APHIS) ability to compete in the world market of animal and animal product trade. Veterinary Services, a division with APHIS is responsible for carry out this disease prevention mission. The agency regulates the importation of animals and animal products into the United States to guard against the introduction of exotic animal diseases such as classical swine fever.

Need and Use of the Information: APHIS will collect information using a certificate issued by a salaried veterinary officer of the Government of Mexico. The certificate must identify both the exporting region and the region of origin as a region designated as free of classical swine fever at the time the swine, pork and pork products were in the region. If the information were not collected it would significantly cripple APHIS ability to ensure that swine, pork, and pork products from certain States within Mexico pose a minimal risk of introducing classical swine fever and other exotic animal diseases into the United States.

Description of Respondents: Federal Government.

Number of Respondents: 5.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 50.

Animal and Plant Health Inspection Service

Title: Animal Welfare; Transportation of Animals on International Carriers.

OMB Control Number: 0579–0247.

Summary of Collection: Under the Animal Welfare Act (AWA) (U.S.C. 2131, *et seq.*), the Secretary of Agriculture is authorized to promulgate standards and other requirements governing the humane handling, care, treatment, and transportation of certain animals by dealers, research facilities, exhibitors, and carriers and intermediate handlers. The Secretary has delegated the responsibility for administering the AWA to the Administrator of the Animal and Plant Health Inspection Service (APHIS). APHIS intends to begin applying the AWA regulations and standards for the human transportation of animals in commerce to all international carriers operating within the United States, its territories, possessions, or the District of Columbia. APHIS believes that animals being transported by international carriers should be afforded the same protection under the AWA as if domestic carriers were transporting them.

Need and Use of the Information: APHIS will collect information using

APHIS forms 7001, United States Interstate and International Certificate of Health Examination for Small Animals and 7011, Application for Registration. The information collected from the forms is necessary for carriers and intermediate handlers to properly care for and deliver the animals to destination in a speedy and humane manner. The information is also used in documenting instances of violations for possible legal action and for locating facilities or person who are evading regulations under the law. If the information were not collected, full enforcement of the AWA would be limited or totally ineffective.

Description of Respondents:

Individuals or households; Not-for-profit institutions.

Number of Respondents: 20.

Frequency of Responses:

Recordkeeping; Reporting: On occasion.

Total Burden Hours: 175.

[Docket No. APHIS–2007–0092]

Notice of Request for Extension of Approval of an Information Collection; Swine Health Protection

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request an extension of approval of an information collection associated with the swine health protection program.

DATES: We will consider all comments that we receive on or before December 10, 2007.

ADDRESSES: You may submit comments by either of the following methods:

- Federal eRulemaking Portal: Go to <http://www.regulations.gov>, select "Animal and Plant Health Inspection Service" from the agency drop-down menu, then click "Submit." In the Docket ID column, select APHIS–2007–0092 to submit or view public comments and to view supporting and related materials available

electronically. Information on using Regulations.gov, including instructions for accessing documents, submitting comments, and viewing the docket after the close of the comment period, is available through the site's "User Tips" link.

- **Postal Mail/Commercial Delivery:** Please send four copies of your comment (an original and three copies) to Docket No. APHIS-2007-0092, Regulatory Analysis and Development, PPD, APHIS, Station 3A-03.8, 4700 River Road Unit 118, Riverdale, MD 20737-1238. Please state that your comment refers to Docket No. APHIS-2007-0092.

Reading Room: You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue, SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690-2817 before coming.

Other Information: Additional information about APHIS and its programs is available on the Internet at <http://www.aphis.usda.gov>.

FOR FURTHER INFORMATION CONTACT: For information on the swine health protection program, contact Dr. David Pyburn, Senior Staff Veterinarian, Aquaculture, Swine, Equine and Poultry Programs, NCAHP, VS, APHIS, 210 Walnut Street Room 891, Des Moines, IA 50309; (515) 284-4122. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 734-7477.

SUPPLEMENTARY INFORMATION:

Title: Swine Health Protection.

OMB Number: 0579-0065.

Type of Request: Extension of approval of an information collection.

Abstract: The Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture regulates the importation and interstate movement of animals and animal products, and conducts various other activities to protect the health of our Nation's livestock and poultry.

The Swine Health Protection Act prohibits the feeding of garbage to swine unless the garbage has been treated to kill disease organisms. Untreated garbage is one of the primary media through which numerous infectious and communicable diseases can be transmitted to swine. APHIS' regulations promulgated under the

Swine Health Protection Act, which are located at 9 CFR part 166, require that, before garbage may be fed to swine, it must be treated at a facility holding a valid permit to treat the garbage and must be treated according to the regulations.

APHIS requires certain information in order to license (issue a permit to) a facility to operate and in order to monitor the facility for compliance with the regulations. This information is collected from applications for a license to operate a garbage treatment facility, records of the destination and date of removal of all food waste or garbage from the treatment facility, and food waste reports. With this information, we are able to carefully monitor garbage treatment facilities to ensure that they are meeting our requirements. The information provided by these information collection activities is critical in preventing the interstate spread of various swine diseases and, therefore, plays a vital role in our swine health protection program.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning this information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

- (2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

- (3) Enhance the quality, utility, and clarity of the information to be collected; and

- (4) Minimize the burden of the information collection on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.927559193 hours per response.

Respondents: Owners/operators (licensees) of garbage treatment facilities, State animal health authorities, and herd owners.

Estimated annual number of respondents: 1,916.

Estimated annual number of responses per respondent: 5.929540709.

Estimated annual number of responses: 11,361.

Estimated total annual burden on respondents: 10,538 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 4th day of October 2007.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

DEPARTMENT OF COMMERCE

International Trade Administration

[A-412-822]

Stainless Steel Bar From the United Kingdom: Notice of Initiation and Preliminary Results of Changed Circumstances Review, and Intent To Revoke Order in Part

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

DATES: *Effective Dates:* October 11, 2007.

SUMMARY: Swagelok Company (Swagelok), an interested party, filed a request for the Department to initiate a changed circumstances review of the antidumping duty order on stainless steel bar from the United Kingdom. Carpenter Technology Corp., Crucible Specialty Metals Division of Crucible Materials Corp., Electralloy Corp., North American Stainless, Universal Stainless & Alloy Products, Inc., and Valbruna Slater Stainless, Inc. (collectively the Domestic Industry) submitted a letter to the Department expressing a lack of interest in continuing to have the product in question subject to the antidumping duty order. The Domestic Industry also stated that it is a major domestic producer of stainless steel bar. Therefore, we are notifying the public of our intent to revoke, in part, the antidumping duty order as it relates to imports of SAF 2507 grade stainless steel bar from the United Kingdom. Interested parties are invited to comment on these preliminary results.
