

within the exterior boundaries of any unit of the National Park System, National Wildlife Refuge System, or National Marine Sanctuary System, or any National Monument. Also, any request for authorization of data collection or technology testing activities in the areas of Nantucket Sound off Massachusetts and off Jones Beach, Long Island, New York, would be considered by the MMS to determine what impact any such authorizations would have on projects that are currently being evaluated by MMS pursuant to the "savings provision" included as section 388(d) of the Energy Policy Act of 2005.

Information Requested From Commenters

As the MMS proposes to authorize on a limited basis the installation of data collection and technology testing facilities to produce or support production of alternative energy on the OCS, we invite all interested and affected parties to provide comments on any aspect of the interim policy. We also would appreciate responses to the questions posed below.

(1) Would you be interested in acquiring an alternative energy resource assessment lease or technology testing lease as proposed under the interim policy? If so, please identify the resource(s) you would want to assess (e.g., wind, wave, current) and the technology you would want to test and provide a general description of the type and number of installations or technologies you would use, prospective locations, and a project schedule for the activities you would propose to pursue. The MMS requests respondents to identify prospective locations by depicting them on Official Protraction Diagrams (Leasing Maps for areas off Texas and Louisiana) available from each MMS regional office and online at <http://www.mms.gov/ld/Maps.htm>. For areas such as those off Hawaii and Alaska that have nonexistent or incomplete Official Protraction Diagrams, please identify prospective locations by latitude and longitude (NAD 83). If you submit such nomination and application information, please provide the name, telephone number, and e-mail address of an individual for the MMS to contact.

(2) Would you be willing to collaborate and enter into joint ventures with other prospective lessees who express interest in acquiring the same location for an alternative energy resource assessment or technology testing lease?

(3) What would be an appropriate lease term (duration) for the

authorization you are interested in acquiring?

(4) Is the rental rate of \$3.00 per acre appropriate?

(5) How much acreage should be authorized for the types of activities proposed and how should leases for such activities be appropriately spaced (i.e., inclusion of buffers)?

(6) How should the MMS define technology testing activities and what specific types of activities should be authorized by technology testing leases? Should technology testing leases accommodate projects that would require a transmission cable to connect to onshore interconnection points?

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination ("ID") (Order No. 19) of the presiding administrative law judge ("ALJ") granting complainant's motion to amend the complaint in the above-captioned investigation.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on March 26, 2007, based on a complaint filed by Microsoft Corporation ("Microsoft") of Redmond, Washington. 72 FR 14138-9. The complaint, as amended and supplemented, alleges violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. **1337, in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain unified communications systems, products used with such systems, and components thereof by reason of infringement of certain claims of U.S. Patent Nos. 6,421,439 ("the '439 patent"); 6,430,289 ("the '289 patent"); 6,263,064 ("the '064 patent"); and 6,728,357 ("the '357 patent"). The complaint further alleges the existence of a domestic industry. The Commission's notice of investigation named Alcatel-Lucent of Paris, France as the only respondent.

On April 20, 2007, Microsoft initially moved to amend the complaint to: (1) Substitute Alcatel Business Systems for Alcatel-Lucent as respondent in this investigation, and (2) add allegations of infringement of claims 8, 28, 38, and 48 of the '439 patent, and claim 20 of the '064 patent. Alcatel-Lucent, proposed respondent Alcatel Business Systems, and the Commission investigative attorney did not oppose the motion.

On May 17 and September 20, 2007, respectively, the Commission determined not to review IDs, issued by the presiding ALJ, granting Microsoft's motions to amend the complaint and to terminate the investigation in part based on Microsoft's withdrawal of certain claims. On October 23, 2007, the Commission determined not to review an ID granting Microsoft's withdrawal of additional claims.

On October 12, 2007, respondent filed an unopposed motion to further amend the complaint to reflect a corporate name change from Alcatel Business Systems to Alcatel-Lucent Enterprise.

On October 15, 2007, the ALJ issued the subject ID granting respondent's motion to amend the complaint. No party petitioned for review of the ID pursuant to 19 CFR 210.43(a). The Commission has determined not to review this ID.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, and in sections 210.14 and 210.42(c) of the Commission's Rules of Practice and Procedure, 19 CFR 210.14, 210.42(c).

Issued: October 25, 2007.

By order of the Commission.

Marilyn R. Abbott,

Secretary to the Commission.
