Nature and Extent of Confidentiality: All reports and plans required by Section 12.2 of the Commission's rules will be automatically afforded confidentiality because the information in these reports and plans is sensitive for both national security and/or commercial reasons.

Needs and Uses: The Commission, in order to help fulfill its statutory obligation to make wire and radio communications services available to all people in the United States for the purpose of the national defense and promoting safety of life and property, adopted an Order (FCC 07-107) that includes an emergency backup power rule (section 12.2). This rule, as modified in an Order on Reconsideration (FCC 07-177) obligates certain specified local exchange carriers (LECs) and commercial mobile radio service (CMRS) providers to file a report that enumerates whether the carriers meet the emergency backup power requirement for certain assets specified by the rule.

Specifically, Section 12.2(c) requires LECs and CMRS providers to file reports with the Commission that identify the following information: (1) Each asset that was designed to comply with the applicable backup power requirement; (2) each asset where compliance is precluded due to risk to safety or life or health; (3) each asset where compliance is precluded by private legal obligation or agreement; (4) each asset where compliance is precluded by Federal,

LECs and CMRS providers must include a description of facts supporting the basis of the LECs or CMRS provider's claim of preclusion from compliance based on risk to safety of life or health, private legal obligation or agreement, or Federal, state, tribal or local law.

Additionally, LECs and CMRS providers identifying assets designed with less than the emergency backup power capacity required in section 12.2(a) and not otherwise precluded from compliance for one of the three reasons identified in section 12.2(b) must comply with the backup power requirement or file, within 12 months from the effective date of section 12.2, a certified emergency backup power compliance plan that is subject to Commission review. The emergency backup power compliance plan must certify and describe how, in the event of a commercial power failure, the LEC or CMRS provider will provide emergency backup power to 100 percent of the area covered by any non-compliant asset, relying on on-site and/or portable backup power sources or other sources as appropriate. This emergency backup power must be sufficient for service coverage as follows: A minimum of 24 hours for assets inside central offices and eight hours for other assets such as cell sites, remote switches, and digital loop carrier system remote terminals.
