

information that is relevant to the identification of nations engaged in IUU activities and bycatch. Sources of information that NMFS may rely upon to make identifications include, but are not limited to:

- fishing vessel records;
- reports from off-loading facilities, port-side government officials, enforcement agents, military personnel, port inspectors, transshipment vessel workers and fish importers;
- government vessel registries;
- IUU vessel lists from RFMOs;
- RFMO catch documents and statistical document programs;
- appropriate catch or trade certification programs; and
- statistical data or incident reports from governments, international organizations, or nongovernmental organizations.

NMFS will consider all available information, as appropriate, when making a determination whether or not to identify a particular nation in the biennial report to Congress. In its determinations as to whether information is appropriate for use in making identifications, NMFS will consider several criteria, including, but not limited to:

- whether the information can be corroborated;
- whether multiple sources have been able to provide information in support of an identification;
- the methodology used to collect the information;
- specificity of the information provided;
- susceptibility of the information to falsification and alteration; and
- credibility of the individual or organization providing the information.

In addition, NMFS poses the following questions: What sources of information should NMFS consider in identifying nations engaged in IUU fishing activities and bycatch of protected living marine resources? Would the above sources of information be useful to NMFS in making such identifications?

In order to process and verify all information in a timely manner, NMFS will not be able to consider any information submitted after the close of the information gathering period (see **DATES**).

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of section 104(c)(6) of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216). Section 104(c)(6) provides for photography for educational or commercial purposes involving non-endangered and non-threatened marine mammals in the wild. NMFS is currently working on proposed regulations to implement this provision. However, in the meantime, NMFS has received and is processing this request as a "pilot" application for Level B Harassment of non-listed and non-depleted marine mammals for photographic purposes.

The applicant has requested a photography permit to film human interactions with spinner dolphins in the coastal waters of Hawaii and Maui. The purpose of the filming is to produce a public service announcement to educate residents and tourists of the Hawaiian Islands about the dangers that swim-with programs pose to the species and illustrate proper dolphin watching techniques. Up to 2,710 dolphins could be harassed annually during aerial and vessel-based close approaches for filming, including underwater filming. Filming would occur from March to October of each year over a period of 4 years.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: March 17, 2008.
