

EPA believes that electronic submission of data will be easier, faster, and more accurate. However, EPA will continue to accept paper reporting forms.

E. How Is EPA Protecting Information Submitted Electronically?

This electronic reporting system is compliant with the Cross Media Electronic Reporting Rule, a base standard that ensures the security of electronic data submissions. In addition, because reporting companies typically claim the quarterly report information as confidential, EPA has implemented robust measures to ensure protection of data submitted electronically, including digital electronic signatures and an encryption and decryption process that meets Agency and industry standards for data security.

F. How Will I Know if EPA Received Information Submitted Electronically?

EPA recognizes the importance of a smooth transition from a paper-based reporting system to an electronic reporting system. Submitters of electronic data will receive e-mail confirmation that EPA has received an electronic data submission. In addition, to ensure the new electronic process is established correctly on users' networks, EPA is requiring participants in electronic reporting to continue submitting hard-copy forms for the first two quarters they are submitting data electronically.

G. How Do I Find Out More About Electronic Reporting?

EPA is providing a number of training resources to assist companies who may wish to transition to the electronic reporting system. Interested companies will be able to download electronic reporting forms, training and guidance documents from EPA's Stratospheric Ozone Protection Program Web site at <http://www.epa.gov/ozone/record/ereport.html>. EPA will also host online training sessions to provide detailed instructions, demonstrations, and an open forum to discuss the online reporting system. Information on such outreach will be available on EPA's Web site. In addition, EPA will provide help desk assistance for companies as they develop and submit electronic reporting packages.
