SUPPLEMENTARY INFORMATION:

Description

The information collection submitted for OMB review contains the following:

1. *Collection of Information:* FERC Form 73 "Oil Pipeline Service Life Data".
2. *Sponsor:* Federal Energy Regulatory Commission.
3. *Control No.* 1902-0019.

The Commission is now requesting that OMB approve with a three-year extension of the expiration date, with no changes to the existing collection. The information filed with the Commission is mandatory.

4. *Necessity of the Collection of Information:* Submission of the information is necessary to enable the Commission to carry out its responsibilities in implementing the statutory provisions of the Department of Energy Organization Act, and Executive Order No. 12009, 42 FR (September 13, 1977). The Commission

has authority over interstate pipelines as stated in the Interstate Commerce Act, 49 U.S.C. 6501 *et al.* As part of the information necessary for the subsequent investigation and review of an oil pipeline company's proposed depreciation rates, the pipeline companies are required to provide public service life data as part of their data submission if the proposed depreciation rates are based on the remaining physical life calculations. This service life data is submitted on FERC Form 73.

The scope of the Commission's jurisdiction over oil pipelines includes the authority to regulate their rates and charges for transportation of oil in interstate commerce, and the authority to establish valuations. Oil pipeline companies are required to submit depreciation information pursuant to 1-8(b)(2) and 1-8(b)(3) of the General Instructions found at 18 CFR Part 352 of the Commission's regulations. These instructions require oil pipeline carriers to compute percentage rate studies for their depreciable property accounts, and to maintain records as to the service life and net salvage value of their property and property retirements.

The Commission uses the information submitted on FERC Form 73 to conduct depreciation rate investigations of oil pipelines. The Commission also uses the information to determine appropriate oil pipeline service lives and book depreciation rates. Oil pipeline companies use book depreciation rates to compute the depreciation portion of their operating expenses when determining their cost of service. The Commission implements these requirements in 18 CFR 357.3 of its regulations.

5. *Respondent Description:* The respondent universe currently comprises on average 2 respondents subject to the Commission's jurisdiction. The Commission estimates that it will receive annually on average 2 filings per year.

6. *Estimated Burden:* 80 total hours, 2 respondents (average per year), 1 response per respondent, and 40 hours per response (average).

7. *Estimated Cost Burden to respondents:* The estimated total cost to respondents is \$4861. (80 hours ÷ 2080 hours per year × \$126,384)

Statutory Authority: Sections 306 and 402 of the Department of Energy Organization Act, Pub. L. 95-91, 42 7155 and 7172,

Interstate Commerce Act (ICA), 49 U.S.C. 6501 *et al.*, and Executive Order No. 12009.

Secretary.
