thinning. The refuge would work with partners to ensure water quality, quantity, minimum flows and levels, and natural hydrology to support migratory birds. The refuge would work to develop cooperative management agreements with the State for the navigable waters on the refuge. It would conduct a refuge boundary survey. Under Alternative B, resource protection would increase. Archaeological resources would be managed the same as under Alternative A. The refuge would evaluate the need to improve the access road. Alternative B would expand visitor services. Hunting and fishing opportunities would be increased, but the refuge would ensure that these activities do not impact migratory birds. The refuge would seasonally close key areas to the public to limit disturbance to migratory birds and eliminate horseback riding. It would incorporate migratory bird themes into commercial guided tour messages. The refuge would develop onand off-site education and interpretive programs with messages focused on migratory birds and the minimization of human impacts. It would train staff, volunteers, teachers, and tour operators to incorporate interpretive themes into programs. Refuge administration would expand under Alternative B. In addition to the 6 positions listed under Alternative A, the following positions would be added for a total of 15 positions: Wildlife specialist (assistant refuge manager), office assistant, biologist, biological science technician (2), maintenance worker (2), law enforcement officer, and park ranger.

Under Alternative C. management would focus on the needs of rare, threatened, and endangered species. More areas on the refuge would be seasonally closed to limit disturbance to priority species. Management of migratory birds would be decreased as the impoundment acreage would decline to support certain listed species. Exotic species control would benefit listed species. Upland and bottomland forest management would focus on the needs of listed species. The refuge would work with partners to conduct herpetological and fish surveys and to protect water resources to support listed species. Archaeological resources would be managed as under Alternative A. The refuge would evaluate the need to improve the access road. It would work with partners to protect wildlife crossing the railroad tracks. Under Alternative C, visitor services would be reduced. The refuge would ensure that hunting and fishing do not impact listed species. The refuge would seasonally

close key areas to the public to limit disturbance to listed species and would eliminate horseback riding. It would incorporate listed species conservation themes into commercial guided tour messages. The refuge would develop onand off-site education and interpretive programs with messages focused on listed species and the minimization of human impacts. It would train staff, volunteers, teachers, and tour operators to incorporate interpretive themes into programs. Friends and volunteer levels and efforts would be increased and focused on the needs of listed species. Refuge administration would expand under Alternative C. In addition to the 6 positions listed under Alternative A, the following positions would be added for a total of 18 positions: Wildlife specialist (assistant refuge manager), office assistant, biologist (2), biological science technicians (2), non-fire forestry technician, maintenance worker (2), law enforcement officer (2), and park ranger.

Under Alternative D, the proposed alternative, wildlife and habitat diversity would be emphasized. This alternative would expand wildlife and habitat management efforts on the refuge. Some key areas would be seasonally closed to the public to limit disturbance to rare, threatened, and endangered species, as well as to protect vulnerable habitats. For migratory birds, the refuge would intensively survey, monitor, and manage the impoundments for multi-species use. Exotic species control efforts would be similar to Alternatives B and C in the level of effort but the focus would be on maintaining biodiversity. The refuge would work with the State to determine the impacts of coyotes. If feral hog control measures become necessary, trapping would be considered. Upland habitats would be managed for biodiversity. Herpetological and fish surveys and monitoring efforts would increase. The refuge would work with the State to develop appropriate cooperative management agreements for the navigable waters on the refuge. A refuge boundary survey would be conducted. The refuge would conduct a complete archaeological survey, and develop a regular patrol and enforcement program. With regards to the railroad, the refuge would work with partners to protect wildlife movement across the railroad tracks. It would evaluate the need to improve the road and determine alternative access routes onto the refuge. Visitor services would expand under this alternative but the refuge would ensure that hunting and fishing do not impact wildlife and habitat diversity. It would evaluate the

potential for turkey hunting. It would continue to allow horseback riding on the Volusia Tract through special use permits. Biodiversity themes would be incorporated into commercial guided tour messages. The refuge would develop on- and off-site education and interpretive programs, with messages focused on biodiversity and the minimization of human impacts. The refuge would train staff, volunteers, teachers, and tour operators to incorporate interpretive themes into programs. It would increase Friends group and volunteer efforts to support wildlife and habitat diversity. As part of refuge administration, the refuge would include maintenance programs in support of biodiversity and biological integrity. In addition to the 6 positions listed under Alternative A, the following positions would be added for a total of 11 positions: Wildlife specialist (assistant refuge manager), biological science technician, maintenance worker, law enforcement officer, and park ranger.

Public Availability of Comments

Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Next Step

After the comment period ends for the Draft CCP/EA, we will analyze the comments and address them in the form of a Final CCP and Finding of No Significant Impact.

Authority: This notice is published under the authority of the National Wildlife Refuge System Improvement Act of 1997, Public Law 105–57.

Dated: February 13, 2008.

Cynthia K. Dohner,

Acting Regional Director.

Receipt of Applications for Permit

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of applications for permit.

SUMMARY: The public is invited to comment on the following applications to conduct certain activities with endangered species and marine mammals.

DATES: Written data, comments or requests must be received by May 23, 2008.

ADDRESSES: Documents and other information submitted with these applications are available for review, subject to the requirements of the Privacy Act and Freedom of Information Act, by any party who submits a written request for a copy of such documents within 30 days of the date of publication of this notice to: U.S. Fish and Wildlife Service, Division of Management Authority, 4401 North Fairfax Drive, Room 212, Arlington, Virginia 22203; fax 703/358-2281.

FOR FURTHER INFORMATION CONTACT: Division of Management Authority, telephone 703/358-2104.

SUPPLEMENTARY INFORMATION:

Endangered Species

The public is invited to comment on the following applications for a permit to conduct certain activities with endangered species. This notice is provided pursuant to Section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 et seq.). Written data, comments, or requests for copies of these complete applications should be submitted to the Director (address above).

Applicant: Zoological Society of San Diego, San Diego, CA, PRT-069323

The applicant requests an amendment and renewal of their permit to authorize the export and re-export of captive-bred/ captive hatched live specimens and the export of viable eggs of California condors (Gymnogyps californianus) originating in the United States, as well as the re-export of wild live specimens of condors originating in Mexico, to La Secretaria de Medio Ambiente v Rescoursos Naturales (SEMARNAT), San Angel, Mexico, for re-introduction into the wild to enhance the survival of the species through completion of identified tasks and objectives mandated under the U.S. Fish and Wildlife Service California Condor Recovery Plan. This notification covers activities to be conducted by the applicant over a five-year period.

Applicant: Zoological Society of San Diego, San Diego, CA, PRT-057398.

The applicant requests an amendment and renewal of their permit to authorize

the import of wild live specimens, viable and non-viable eggs, biological samples and salvaged materials of California condors (Gymnogyps californianus) originating in Mexico, as well as the re-import of captive-bred/ captive hatched live specimens, viable and non-viable eggs, biological samples and salvaged materials of condors originating in the United States, to enhance the survival of the species through completion of identified tasks and objectives mandated under the U.S. Fish and Wildlife Service California Condor Recovery Plan. This notification covers activities to be conducted by the applicant over a five-year period. Applicant: Memphis Zoo, Memphis,

TN, PRT-052166.

The applicant requests renewal of their permit for scientific research with two giant pandas (Ailuropoda melanoleuca) currently held under loan agreement with the Government of China and under the provisions of the USFWS Panda Policy. The proposed research will cover all aspects of behavior, reproductive physiology, genetics, nutrition, and animal health and is a continuation of activities currently in progress. This notification covers activities to be conducted by the applicant over a five-year period.

Applicant: Thomas J. Hammond, Oakland Twp., MI, PRT-175465.

The applicant requests a permit to import the sport-hunted trophy of one cheetah (Acinonyx jubatus) taken in Namibia, for the purpose of enhancement of the survival of the species.

Applicant: Chattanooga Zoo, Chattanooga, TN, PRT-178755.

The applicant requests a permit to import one captive-born male jaguar (Panthera onca) from Complejo Ecologico Municipal, Presidencia Roque Sáenz Peña, Argentina, for the purpose of enhancement of survival of the species.

Marine Mammals

The public is invited to comment on the following application for a permit to conduct certain activities with marine mammals. The application was submitted to satisfy requirements of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 et seq.), and the regulations governing marine mammals (50 CFR Part 18). Written data, comments, or requests for copies of the complete application or requests for a public hearing on this application should be submitted to the Director (ADDRESSES above). Anyone requesting a hearing should give specific reasons why a hearing would be appropriate.

The holding of such a hearing is at the discretion of the Director.

Applicant: Jimmie R. Ryan, Alabaster, ÅL, PRT–179123.

The applicant requests a permit to import a polar bear (Ursus maritimus) sport hunted from the Southern Beaufort Sea polar bear population in Canada for personal, noncommercial

Dated: March 21, 2008.

Lisa J. Lierheimer,

Senior Permit Biologist, Branch of Permits, Division of Management Authority.
