

- 2. Issues to be resolved through policy or administrative action; or
- 3. Issues beyond the scope of the RMPs/EIS.

Rationale will be provided in the RMPs/EIS for each issue placed in category two or three. In addition to these major issues, a number of management questions and concerns will be addressed in the RMPs/EIS. The public is encouraged to help identify these questions and concerns during the scoping phase.

The BLM will use an interdisciplinary approach to develop the RMPs/EIS in order to consider the variety of resource issues and concerns identified. Specialists with expertise in the following disciplines will be involved in the planning process, including but not limited to: Rangeland management, minerals and geology, wildland fire and fuels management, outdoor recreation, archaeology, paleontology, wildlife and fisheries, lands and realty, soil, water and air, global climate change, wild horses, environmental justice, sociology and economics.

The following planning criteria have been proposed to guide development of the RMPs/EIS, avoid unnecessary data collection and analyses, and to ensure the RMPs/EIS are tailored to the issues. Other criteria may be identified during the public scoping process. After gathering comments on planning criteria, the BLM will finalize the criteria and provide feedback to the public on the criteria to be used throughout the planning process. Some of the planning criteria that are under consideration include:

- The planning process for the Billings and PPNM RMPs will include a single EIS and culminate with the issuance of two Records of Decision (RODs).
- The RMPs/EIS will be completed in compliance with FLPMA, NEPA, the Endangered Species Act (ESA), and all other applicable laws, regulations and BLM policies.
- The RMPs/EIS will establish new guidance and identify existing guidance upon which the BLM will rely in managing public lands within the Billings Field Office and the PPNM.
- The RMPs/EIS will incorporate by reference the *Standards for Rangeland Health and Guidelines for Livestock Grazing Management* (August 1997); *Areas of Critical Environmental Concern (ACEC) Amendment* (August 1998); the *Off-Highway Vehicle EIS and Plan Amendment for Montana, North Dakota, and Portions of South Dakota* (June 2003); the *1992 Oil & Gas EIS/Amendment of the Powder River, Billings, & South Dakota RMPs*; the

Montana Final Statewide Oil and Gas EIS and Proposed Amendment of the Powder River and Billings RMP (January 2003); the *Montana/Dakotas Statewide Fire/Fuels Management Plan* (September 2003); *Final Programmatic EIS on Wind Energy Development* (June 2005); *Best Management Practices for Forestry in Montana*; the *Montana Streamside Management Zone Law and Rule*; and, when finalized, the *Supplemental EIS to the Montana Statewide Oil and Gas Amendment*; and the *Vegetation Treatments Using Herbicides EIS*.

- The RMPs/EIS will incorporate, by reference, all prior wilderness study area (WSA) findings that affect public lands in the planning area.
- The planning team will use a collaborative and multi-jurisdictional approach, where applicable, throughout the planning process.
- The planning process will include early consultation meetings with the United States Fish and Wildlife Service (USFWS) during the development of the RMPs/EIS.
- The RMPs/EIS will result in determinations as required by special program and resource specific guidance detailed in Appendix C of the BLM's Planning Handbook (H-1610-1).
- The Billings RMP will incorporate the requirements of the BLM Handbook H-1624-1, *Planning for Fluid Minerals*.
- The RMPs/EIS will incorporate the requirements of the interagency reference guide entitled *Reasonably Foreseeable Development Scenarios and Cumulative Effects Analysis* developed by the Rocky Mountain Federal Leadership Forum on NEPA, Oil and Gas, and Air Quality.
- The RMPs/EIS will recognize the State of Montana's responsibility to manage wildlife populations, including uses such as hunting and fishing, within the planning area.
- To the extent possible, goals and objectives in the RMPs/EIS for plants and wildlife (including special status species) will incorporate or respond to goals and objectives from established recovery plans, conservation strategies, strategic plans, etc.
- Decisions in the RMPs/EIS will strive to be compatible with the existing plans and policies of adjacent local, state, tribal, and federal agencies to the extent they are in conformance with legal mandates on management of public lands.
- The scope of analysis will be consistent with the level of analysis in approved plans and in accordance with Bureau-wide standards and program guidance.

- Geospatial data will be automated within a geographic information system (GIS) to facilitate discussions of the affected environment, alternative formulation, analysis of environmental consequences, and display of the results.

- Resource allocations must be reasonable and achievable within available technological and budgetary constraints.

- Best management practices (BMPs) for oil and gas, road drainage, grazing, wind energy, and water quality BMPs for Montana forests, fire rehab, power lines, etc. will be added.

- The planning process will involve Native American Tribal governments and will provide strategies for ensuring the Tribes' needs are considered, analyzed and that the BLM fulfills its trust responsibilities.

- The lifestyles and concerns of area residents will be recognized in the RMPs/EIS.

- The State Historic Preservation Office (SHPO) will be consulted on any potential effect of the RMPs/EIS on cultural resources under provisions of the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470f) and under the National Programmatic Agreement.
