

of the FWRWG has been prepared pursuant to the request initiated from NOAA for an external panel of experts to carry out an independent review of current fire weather research being conducted by NOAA and other federal agencies, and in universities and elsewhere, and examine how the results of that research are being further developed and transitioned to operations by NOAA.

DATES: Comments on this preliminary report must be received by 5 p.m. on September 19, 2008.

ADDRESSES: The Preliminary Draft Report of the FWRWG will be available on the NOAA Science Advisory Board Web site at <http://www.sab.noaa.gov/Reports/FWRWG>.

The public is encouraged to submit comments electronically to noaa.sab.comments@noaa.gov. For individuals who do not have access to the Internet, comments may be submitted in writing to: NOAA Science Advisory Board (SAB), c/o Dr. Cynthia Decker, 1315 East-West Highway—R/SAB, Silver Spring, Maryland 20910.

FOR FURTHER INFORMATION CONTACT: Dr. Cynthia Decker, Executive Director, Science Advisory Board, NOAA, 1315 East-West Highway—R/SAB, Silver Spring, Maryland 20910. SUPPLEMENTARY INFORMATION: As part of its charge, the FWRWG was tasked to examine fire weather-related research efforts conducted by groups external to NOAA and identify areas of commonality where research activities might be leveraged for mutual benefit. The FWRWG was requested to develop findings and recommendations to ensure these research results lead to improved operational fire weather information and forecasts and to examine related research within NOAA not necessarily specific to fire but which could result in improved fire weather services or other NOAA emergency support operations. The complete terms of reference for the working group can be found at http://www.sab.noaa.gov/Working_Groups/current/fireweather/FWRWG_terms.pdf.

The SAB is chartered under the Federal Advisory Committee Act and is the only Federal Advisory Committee with the responsibility to advise the Under Secretary on long- and short-term strategies for research, education, and application of science to resource management and environmental assessment and prediction.

The applicant requests authorization to conduct research during vessel surveys on live cetaceans and coral and collect tissues from dead, stranded cetaceans in U.S. waters and on the high seas. Field research activities would include biopsy sampling, collection of sloughed skin

and feces, photo-identification, videography, passive acoustic recording, focal follows, and behavioral observation during vessel surveys for up to 250 sperm whales annually and 20 animals annually for each of the above remaining species, except southern right whales. The applicant would also import from foreign waters 150 sperm whale samples per year and 20 samples per year each for all other identified species. This research would help determine: (1) which classes of pollutants are elevated around the world; (2) which pollutants pose the largest risk to whales; (3) which responses made by whales to pollutants are similar to responses made by humans; (4) the locations of pollution hot spots around the world; and (5) the population and behavioral dynamics of these species. Research would occur in U.S. waters and the high seas of the Pacific and Atlantic Oceans, including the Gulf of Maine, Mexico and the Caribbean Sea, the territorial waters of Mexico, Indian Ocean, and Mediterranean Sea.
