

American sacred sites; a unique community of Wyoming sensitive plant species; high-quality paleontological resources; open space and dispersed recreation opportunities; and unique geology and unstable soils. The ACEC would be unavailable for oil and gas leasing and closed to the placement of new communication sites. Off-road vehicle use would be limited to designated roads and trails. Surface occupancy and disturbance would be prohibited on erosive soils, sensitive plant species habitats, and on slopes greater than 10 percent.

- *CCC Ponds ACEC (5,530 acres [Alternative 3])*: Values of concern are a wildlife migration bottleneck on a well-defined mule deer migration route and recreational values including a developed, non-motorized trail system, fishing ponds, and interpretive facilities. The ACEC would be unavailable for oil and gas leasing and would be closed to mineral location and land disposal. Off-road vehicle use would be limited to designated roads and trails.

Alternative 1 proposes to maintain the status of the two existing ACECs identified in the 1988 Pinedale RMP. Alternative 2 proposes to eliminate the two existing ACECs, and establish a new ACEC at Trapper's Point (550 acres). Alternative 3 proposes to maintain the existing Rock Creek and Beaver Creek ACECs, and establish all of the new ACECs listed above (6), for a total of eight ACECs.

As a result of public scoping and the alternative development process, Alternative 4 (Agency Preferred Alternative) proposes the following ACECs: Maintain the status of one existing ACEC (Beaver Creek); maintain and reduce slightly in size one existing ACEC (Rock Creek); and establish two new ACECs: Trapper's Point (4,000 acres) and New Fork Potholes (1,800 acres).

Comments received on the Draft RMP/EIS from the public and internal BLM review comments were incorporated into the proposed plan. Public comments resulted in the addition of clarifying text but did not significantly change proposed land use decisions. After careful consideration of both public and internal comments received on the Draft RMP/EIS, adjustments and clarifications have been made to Alternative 4, the Preferred Alternative. As modified, Alternative 4 is now presented as the Pinedale Proposed RMP in the Final EIS.

Instructions for filing a protest with the Director of the BLM regarding the PRMP/FEIS may be found in the Dear Reader Letter of the Pinedale PRMP/

FEIS and at 43 CFR 1610.5. E-mail and faxed protests will not be accepted as valid protests unless the protesting party also provides the original letter by either regular or overnight mail postmarked by the close of the protest period. Under those conditions, the BLM will consider the e-mail or faxed protests as an advance copy and it will receive full consideration. If you wish to provide the BLM with such advance notification, please direct faxed protests to the attention of the BLM protest coordinator at (202) 557-3599, and e-mails to *Brenda_Hudgens-Williams@blm.gov*. All protests, including the follow-up letter (if e-mailing or faxing) must be in writing and mailed to the appropriate address, as set forth in the **ADDRESSES** section above. Before including your phone number, e-mail address, or other personal identifying information in your protest, you should be aware that your entire protest—including your personal identifying information—may be made publicly availability at any time. While you can ask us in your protest to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

SUPPLEMENTARY INFORMATION:

The Vernal RMP planning area is located in northeast Utah. The BLM administers approximately 1.7 million acres of surface estate and 2.8 million acres of Federal mineral estate within the planning area.

The Vernal RMP will provide future broad-scale management direction for land use allocations and allowable uses on public lands within the planning area. Implementation of the decisions of the PRMP/FEIS would apply only to BLM-administered public lands and Federal mineral estate. In the Vernal Field Office Draft RMP/EIS (DRMP/DEIS), which was released for a 90-day public review and comment period in January 2005, four alternatives were analyzed, including a No Action alternative. These alternatives were developed through issue identification during the scoping process. Such issues included: special designations (ACECs and WSRs), minerals and energy development, and recreational (OHV) use. In October 2007 a Supplemental DEIS was issued which considered an additional alternative emphasizing the protection of non-WSA lands with Wilderness Characteristics.

The PRMP/FEIS would designate no new Areas of Critical Environmental Concern (ACECs), and the continuation of six existing ACECs, totaling 123,227

acres. Resource use limitations that range of different prescriptions as apply to the proposed ACECs include a described in Table 1 below.

TABLE 1—EVALUATION OF AREAS OF CRITICAL ENVIRONMENTAL CONCERN

Area name	Values of concern	Resource use limitations	Acres
Browns Park	Cultural, wildlife, habitat, and scenic views.	Closed to OHV use, or limited to designated routes	18,474
Red Mountain—Dry Fork	Watershed, relict vegetation, and big game habitat.	No surface occupancy, or timing/controlled surface use for oil and gas; OHV use limited to designated routes.	24,285
Nine-Mile Canyon	Cultural, and special status plant species.	The area would be open subject to standard lease terms or managed as NSO for oil and gas leasing; OHV use would be limited to designated routes.	44,181
Lears Canyon	Relict vegetation	No surface occupancy for oil and gas, closed to mineral material sales.	1,375
Pariette	Wetland, wildlife, and plant habitat.	No surface occupancy for oil and gas, closed to mineral material sales.	10,437
Red Creek	Watershed and wildlife habitat	No surface occupancy and controlled surface use; OHV use is limited to designated routes.	24,475

Comments on the Vernal Field Office DRMP/DEIS received from the public and internal BLM review were considered and incorporated as appropriate into the PRMP/FEIS. Public comments resulted in the addition of clarifying text, but did not significantly change proposed land use plan decisions.

Instructions for filing a protest with the Director of the BLM regarding the PRMP/FEIS may be found in the Dear Reader Letter of the PRMP/FEIS and at 43 CFR 1610.5–2.

E-mail and faxed protests will not be accepted as valid protests unless the protesting party also provides the original letter by either regular or overnight mail postmarked by the close of the protest period. Under these conditions, the BLM will consider the e-mail or faxed protest as an advance copy and it will receive full consideration. If you wish to provide the BLM with such advance notification, please direct faxed protests to the attention of the BLM protest coordinator at 202–452–5112, and e-mails to *Brenda_Hudgens-Williams@blm.gov*.

All protests, including the follow-up letter (if e-mailing or faxing) must be in writing and mailed to the appropriate address, as set forth in the **ADDRESSES** section above.
