AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the availability of EPA's Final Work Plans and Proposed Registration Review Decisions for the pesticides cases Capric (Decanoic) Acid and Sodium Hydroxide (Mineral Bases, Strong), and opens a public comment period on the proposed registration review decisions. Registration review is EPA's periodic review of pesticide registrations to ensure that each pesticide continues to satisfy the statutory standard for registration, that is, that the pesticide can perform its intended function without unreasonable adverse effects on human health or the environment. Through this program, EPA is ensuring that each pesticide's registration is based on current scientific and other knowledge, including its effects on human health and the environment.

DATES: Comments must be received on or before October 28, 2008.

ADDRESSES: Submit your comments, identified by docket identification (ID) numbers EPA-HQ-OPP-2007-0922 for Sodium Hydroxide (Mineral Bases, Strong) and EPA-HQ-OPP-2007-1040 for Capric (Decanoic) Acid, by one of the following methods:

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general, and may be of interest to a wide range of stakeholders including environmental, human health, farm worker, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions

regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).

ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.

iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

iv. Describe any assumptions and provide any technical information and/or data that you used.

v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

vi. Provide specific examples to illustrate your concerns and suggest alternatives.

vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

viii. Make sure to submit your comments by the comment period deadline identified.

II. Background

A. What Action is the Agency Taking?

This notice opens a 60-day public comment period on the subject proposed registration review decisions. The Agency is proposing registration review decisions for the pesticide cases shown in the following Table.

REGISTRATION REVIEW DOCKETS — PROPOSED FINAL DECISIONS

Registration Review Case Name and Number	Pesticide Docket ID Number	Regulatory Contact name, Phone Number, E-mail Address
Case 4065; Sodium Hydroxide (Mineral Bases, Strong)	EPA-HQ-OPP-2007-0922	Diane Isbell; (703) 308-8154; isbell.diane@epa.gov
Case 5038; Capric (Decanoic) Acid	EPA-HQ-OPP-2007-1040	Eliza Blair; (703) 308-7279 blair.eliza@epa.gov

The dockets for registration review of these pesticide cases include earlier documents related to the registration review of the subject cases. For example, the review opened with the posting of a Summary Document, containing a Preliminary Work Plan (PWP), for public comment. Because no comments were received, and because the Agency required no further risk assessments to complete registration review of these cases, the Final Work Plan and Proposed Decision were combined into a single document. The documents in the initial docket described the Agency's rationale for not conducting new risk assessments for the registration review of Sodium Hydroxide (Mineral Bases, Strong) and Capric (Decanoic) Acid. These proposed registration review decisions now included in the dockets continue to be

supported by those rationales included in documents in the initial dockets. Following public comment, the Agency will issue a final registration review decision for each case.

The registration review program is being conducted under congressionally mandated time frames, and EPA recognizes the need both to make timely decisions and to involve the public. Section 3(g) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended in 1996 required EPA to establish by regulation procedures for reviewing pesticide registrations, originally with a goal of reviewing each pesticide's registration every 15 years to ensure that a pesticide continues to meet the FIFRA standard for registration. The Agency's final rule to implement this program was issued in August 2006 and became effective in

October 2006 and appears at 40 CFR part 155.40 *et seq.* The Pesticide Registration Improvement Act of 2003 ("PRIA") was amended and extended in September 2007. FIFRA as amended by PRIA in 2007 requires EPA to complete registration review decisions by October 1, 2022 for all pesticides registered as of October 1, 2007. The registration review final rule provides for a minimum 60-day public comment period for all proposed registration review decisions. This comment period is intended to provide an opportunity for public input and a mechanism for initiating any necessary amendments to the proposed decision(s). All comments should be submitted using the methods in **ADDRESSES**, and must be received by EPA on or before the closing date. These comments will become part of the Agency Dockets for Sodium Hydroxide

(Mineral Bases, Strong) and Capric (Decanoic) Acid. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments. The Agency will carefully consider all comments received by the closing date and will provide a Response to Comments Memorandum in the Dockets and www.regulations.gov. The final registration review decisions will explain the effect that any comments have had on the decisions.

Background on the registration review program is provided at: http://www.epa.gov/oppsrrd1/registration_review/. Quick links to earlier documents related to the registration review of this pesticide are provided at: http://www.epa.gov/oppsrrd1/registration_review/reg_review_status.htm/.

B. What is the Agency's Authority for Taking this Action?

FIFRA Section 3(g) and 40 CFR part 155.40 *et seq.* provide authority for this action.

Carbofuran; Notice of Availability of Revised Surface Water Exposure Assessment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the availability of EPA's revised surface water exposure assessment for the pesticide carbofuran. This revised assessment reflects the most current soil input parameters for the surface water exposure modeling done for the dietary risk assessment for carbofuran. While the underlying information based on soil type has been updated, the Agency's ultimate risk conclusions have not changed. The new drinking water exposure assessment dated August 20, 2008, entitled "Updated Refinements of

the Drinking Water Exposure Assessment for the Use of Carbofuran on Corn and Melons," is in the carbofuran docket.

II. Background

A. What Action is the Agency Taking?

Upon further review of its underlying assessments, the Agency has updated its drinking water exposure assessment for the pesticide carbofuran to reflect the most current soil input parameters for the surface water source drinking water exposure modeling. Soil information for 8 of the 11 scenarios has been updated to more closely resemble soils in the areas where the scenarios for these crops were modeled. Of the 11 scenarios, 2 resulted in concentrations that remained largely unchanged (Minnesota corn and Nebraska corn); and 6 scenarios resulted in concentrations that decreased slightly (Iowa corn, Indiana corn, Kansas corn, Michigan melon, Missouri melon, and New Jersey melon). The remaining 3 scenarios (Illinois corn, Texas corn, and Florida melons) were not modified and remain unchanged. Despite the revisions to certain of the underlying assessments from use of the more recent soil types, the Agency's ultimate risk conclusions regarding carbofuran's overall dietary risks remain unchanged. EPA is providing notice of its revised assessments to allow the public the opportunity to comment on the Agency's revisions during the comment period on its proposed tolerance revocations.

The updated exposure assessment, dated August 20, 2008, entitled "Updated Refinements of the Drinking Water Exposure Assessment for the Use of Carbofuran on Corn and Melons," is in the carbofuran docket (EPA-HQ-OPP-2005-0162) at <http://www.regulations.gov>.
