ACRS Subcommittee Meetings

In accordance with the revised FACA, the agency is no longer required to apply the FACA requirements to meetings conducted by the Subcommittees of the NRC Advisory Committees, if the Subcommittee's recommendations would be independently reviewed by its parent Committee.

The ACRS, however, chose to conduct its Subcommittee meetings in accordance with the procedures noted above for ACRS full Committee meetings, as appropriate, to facilitate public participation, and to provide a forum for stakeholders to express their views on regulatory matters being considered by the ACRS. When Subcommittee meetings are held at locations other than at NRC facilities,

reproduction facilities may not be available at a reasonable cost. Accordingly, 50 copies of the materials to be used during the meeting should be provided for distribution at such meetings.

Special Provisions When Proprietary Sessions Are To Be Held

If it is necessary to hold closed sessions for the purpose of discussing matters involving proprietary information, persons with agreements permitting access to such information may attend those portions of the ACRS meetings where this material is being discussed upon confirmation that such agreements are effective and related to the material being discussed.

The DFO should be informed of such an agreement at least 5 working days prior to the meeting so that it can be confirmed, and a determination can be made regarding the applicability of the agreement to the material that will be discussed during the meeting. The minimum information provided should include information regarding the date of the agreement, the scope of material included in the agreement, the project or projects involved, and the names and titles of the persons signing the agreement. Additional information may be requested to identify the specific agreement involved. SUPPLEMENTARY INFORMATION:

I. Introduction

The public meeting announced in 73 FR 56618 on September 29, 2008, has been cancelled and will be rescheduled for a later date. The public should go to the U.S. Nuclear Regulatory Commission's (NRC's) NRC's Web site at <http://www.nrc.gov/public-involve.html> and watch for an announcement of the rescheduled public meeting.

Also in 73 FR 56618, the NRC noticed the issuance and availability of DG-5026, "Fatigue Management for Nuclear Power Plant Personnel," for public comment. This regulatory guide provides a method that the staff of the NRC considers acceptable for complying with the Commission's regulations for managing personnel fatigue at nuclear power plants.

The regulations established by the NRC in Title 10, Part 26, of the *Code of Federal Regulations* (10 CFR Part 26), "Fitness for Duty Programs," establish requirements for ensuring that personnel are fit to safely and competently perform their duties. Subpart I, "Managing Fatigue," of 10 CFR Part 26 establishes requirements for managing personnel fatigue at nuclear power plants. The regulations in Subpart I provide a comprehensive and integrated approach to fatigue management, taking into account the multiple causes and effects of worker fatigue. The Commission recognizes that the potential for excessive fatigue is not solely based on extensive work hours, but also on other causal factors, such as stressful working conditions, sleep disorders, accumulation of sleep debt and the disruptions of circadian rhythms associated with shift work. These considerations are reflected in the requirements of the rule in order to ensure that licensees effectively manage worker fatigue and provide reasonable assurance that workers are able to safely and competently perform their duties.

II. Further Information

The NRC staff is soliciting comments on DG-5026. Comments may be accompanied by relevant information or supporting data, and should mention DG-5026 in the subject line.
