

provided the reports to the Service. Specify the corresponding time frame.

**Response:** The Service has updated the stock assessment report to reflect the requested changes. However, the information provided by the NMFS did not include a time frame; therefore, a time frame has not been included in the updated stock assessment report.

**Comment 5:** Given the apparent lack of voluntary reports of sea otter takes and the unreliability of voluntary reporting schemes in general, remove the word "more" from the sentence on page 5 that states "\* \* \* the information provided by the NMFS is not sufficient to provide a more accurate estimate of annual mortality \* \* \*." Further, a statement should be made that a useful estimate of fishing mortality will require instituting observer coverage to obtain data on fishery efforts.

**Response:** We have revised the final stock assessment report to reflect this comment. The fishery observer programs are conducted by the NMFS of the Department of Commerce, and, therefore, institution of observer coverage in fisheries must be directed to them. We have forwarded this suggestion to them (see response to comment 6).

**Comment 6:** The stock assessment report concludes that available information is not adequate to make a reliable assessment of incidental take levels. Therefore, the Service should consult with NMFS, Tribal authorities, and other relevant groups to arrange for the placement of observers aboard trap and gillnet fishing vessels that may incidentally take sea otters.

**Response:** The fishery observer programs are under the administration of the NMFS in accordance with section 118 of the MMPA. With the exception of the Puget Sound Region salmon drift gillnet, all commercial fisheries in the State of Washington that have the potential to take sea otters are classified as Category III in NMFS' List of Fisheries. Category III fisheries are not required to accommodate observers. Further, under this program, fishery interactions are self-reporting or, in some cases, identified as excluded, *e.g.*, treaty Tribal fishing. It is the position of the Service that the incidental take of sea otters by treaty Tribal fishing activities must be authorized under the MMPA. Nonetheless, obtaining incidental take information is a challenge. However, the Service will continue to work with the NMFS, Tribal authorities, and others to the extent practicable under these conditions to obtain better data.

**Comment 7:** Illegal taking of sea otters is being perpetrated by "fish profiteers" and the Service is not taking appropriate action.

**Response:** The stock assessment report presents all of the human-caused mortality of sea otters that has been made known to the Service.
