The NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards. This rulemaking does not involve technical standards. Therefore, EPA did not consider the use of any voluntary consensus standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order (EO) 12898 (59 FR 7629 (Feb. 16, 1994)) establishes federal executive policy on environmental justice. Its main provision directs federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States.

EPA has determined that this final rule will not have disproportionately high and adverse human health or environmental effects on minority or low-income populations because it increases the level of environmental protection for all affected populations without having any disproportionately high and adverse human health or environmental effects on any population, including any minority or low-income population. EPA anticipates that this rule will have a positive impact on the environment and human health by removing a disincentive to preventive maintenance of aircraft halon bottles and reducing the likelihood of accidental emissions. Thus, this rule is not expected to increase the impacts on the health of minority or low-income populations from stratospheric ozone depletion.

K. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in

the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2). This rule will be effective April 9, 2009.

Background

Amendment 15 to the FMP created a vessel license limitation program for the three non-tribal sectors of the Pacific whiting fishery off the U.S. West Coast. Under current Federal regulations, catcher vessels in the Pacific whiting shoreside fishery, catcher vessels in the mothership fishery, and catcher/processor vessels, must be registered to a groundfish limited entry permit that has a trawl gear endorsement. Mothership vessels are not required to be registered to a groundfish limited entry permit because the process only and do not harvest. The limited entry program has been in place since 1994 and allows appropriately registered vessels to participate in groundfish fisheries targeting any of the 90+ species managed under the Pacific Coast Groundfish FMP. This action implements Amendment 15 to the FMP by establishing regulations that require vessels to qualify for a Pacific whiting vessel license limitation program to harvest and/or process in the non-tribal Pacific whiting fishery. This is in addition to the requirement for harvesting vessels to be registered to a groundfish limited entry permits. Amendment 15 and the implementing regulations are intended to serve as an interim measure that will be discontinued when the Pacific Fishery Management Council adopts and the National Marine Fisheries Service implements a trawl rationalization program under Amendment 20 to the Pacific Groundfish FMP. Amendment 20 is currently under development by the Council, which adopted its preliminary preferred alternative at the June 2008 Council meeting. The Council anticipates taking final action on the trawl rationalization program in November 2008. If NMFS approves Amendment 20, implementation is scheduled for late 2010, at which time the regulations implementing Amendment 15 would be replaced by those implementing Amendment 20. If development and implementation of Amendment 20 is delayed beyond that point, NMFS intends to request that the Council reconsider the provisions of Amendment 15.

NMFS published a Notice of Availability for Amendment 15 on March 19, 2008 (73 FR 14765), and requested public comment on it through May 19, 2008. No public comments were received on the amendment.
