

information by referring to its OMB Control Number.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995, before an agency submits a proposed collection of information to OMB for approval, it must first publish a document in the **Federal Register** providing a 30-day comment period and otherwise consult with members of the public and affected agencies concerning each proposed collection of information. The OMB has regulations describing what must be included in such a document. Under OMB's regulation (at 5CFR 1320.8(d)), an agency must ask for public comment on the following:

(i.) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii.) The accuracy the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii.) How to enhance the quality, utility, and clarity of the information to be collected;

(iv.) How to minimize the burden of the collection of information on those who are to respond including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g. permitting electronic submission of responses.

In compliance with these requirements, NHTSA asks for public comments on the following proposed collections of information:

Title: Extension of Clearance.

OMB Control Number: 2127-0001.

Affected Public: State, Local, or Tribal Government.

Form Number: This collection of information uses no standard form.

Abstract: The purpose of the NDR is to assist States and other authorized users in obtaining information about problem drivers. State motor vehicle agencies submit and use the information for driver licensing purposes. Other users obtain the information for transportation safety purposes.

Estimated Annual Burden: 4157

Number of Respondents: The number of respondents is 51—the fifty States and the District of Columbia.

Comments are invited on: whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collection;

ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondent, including the use of automated collection techniques or other forms of information technology.

Issued on May 7, 2009.

Dennis Utter,

Office Director for the Office of Traffic Records and Analysis.

DEPARTMENT OF TRANSPORTATION

[Docket No. FRA-2009-0001-N-10]

Notice and Request for Comments

AGENCY: Federal Railroad Administration, DOT.

ACTION: Notice and Request For Comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Requirements (ICRs) abstracted below have been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICRs describe the nature of the information collections and their expected burdens. The **Federal Register** notice with a 60-day comment period soliciting comments on the following collections of information was published on March 3, 2009 (74 FR 9331).

DATES: Comments must be submitted on or before June 12, 2009.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Brogan, Office of Safety, Planning and Evaluation Division, RRS-21, Federal Railroad Administration, 1200 New Jersey Ave., SE., Mail Stop 17, Washington, DC 20590 (telephone: (202) 493-6292), or Ms. Nakia Jackson, Office of Information Technology, RAD-20, Federal Railroad Administration, 1200 New Jersey Ave., SE., Mail Stop 35, Washington, DC 20590 (telephone: (202) 493-6073). (These telephone numbers are not toll-free.)

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act of 1995 (PRA), Public Law 104-13, Section 2, 109 Stat. 163 (1995) (codified as revised at 44 U.S.C. 3501-3520), and its implementing regulations, 5 CFR Part 1320, require Federal agencies to issue two notices seeking public comment on information collection activities before OMB may approve paperwork packages. 44 U.S.C. 3506, 3507; 5 CFR 1320.5, 1320.8(d)(1), 1320.12. On March 3,

2009, FRA published a 60-day notice in the **Federal Register** soliciting comment on ICRs that the agency was seeking OMB approval. 74 FR 9331. FRA received no comments after issuing this 60-day notice. Accordingly, DOT announces that these information collection activities have been re-evaluated and certified under 5 CFR 1320.5(a) and forwarded to OMB for review and approval pursuant to 5 CFR 1320.12(c).

Before OMB decides whether to approve these proposed collections of information, it must provide 30 days for public comment. 44 U.S.C. 3507(b); 5 CFR 1320.12(d). Federal law requires OMB to approve or disapprove paperwork packages between 30 and 60 days after the 30 day notice is published. 44 U.S.C. 3507(b)-(c); 5 CFR 1320.12(d); *see also* 60 FR 44978, 44983, Aug. 29, 1995. OMB believes that the 30 day notice informs the regulated community to file relevant comments and affords the agency adequate time to digest public comments before it renders a decision. 60 FR 44983, Aug. 29, 1995. Therefore, respondents should submit their respective comments to OMB within 30 days of publication to best ensure having their full effect. 5 CFR 1320.12(c); *see also* 60 FR 44983, Aug. 29, 1995.

The summaries below describe the nature of the information collection requirements (ICRs) and the expected burden. The revised requirements are being submitted for clearance by OMB as required by the PRA.

Title: Railroad Signal System Requirements.

OMB Control Number: 2130-0006.

Type of Request: Extension of a currently approved collection.

Affected Public: Railroads.

Abstract: The regulations pertaining to railroad signal systems are contained in 49 CFR Parts 233 (Signal System Reporting Requirements), 235 (Instructions Governing Applications For Approval of A Discontinuance or Material Modification of a Signal System), and 236 (Rules, Standards, and Instructions Governing the Installation, Inspection, Maintenance, and Repair of Systems, Devices, and Appliances). Section 233.5 provides that each railroad must report to FRA within 24 hours after learning of an accident or incident arising from the failure of a signal appliance, device, method, or system to function or indicate as required by Part 236 of this Title that results in a more favorable aspect than intended or other condition hazardous to the movement of a train. Section 233.7 sets forth the specific requirements for reporting signal

failures within 15 days in accordance with the instructions printed on Form FRA F 6180.14. Finally, Section 233.9 sets forth the specific requirements for the "Signal System Five Year Report." It requires that every five years each railroad must file a signal system status report. The report is to be prepared on a form issued by FRA in accordance with the instructions and definitions provided. Title 49, Part 235 of the Code of Federal Regulations, sets forth the specific conditions under which FRA approval of modification or discontinuance of railroad signal systems is required and prescribes the methods available to seek such approval. The application process prescribed under Part 235 provides a vehicle enabling FRA to obtain the necessary information to make logical and informed decisions concerning carrier requests to modify or discontinue signaling systems. Section 235.5 requires railroads to apply for FRA approval to discontinue or materially modify railroad signaling systems. Section 235.7 defines material modifications and identifies those changes that do not require agency approval. Section 235.8 provides that any railroad may petition FRA to seek relief from the requirements under 49 CFR Part 236. Sections 235.10, 235.12, and 235.13 describe where the petition must be submitted, what information must be included, the organizational format, and the official authorized to sign the application. Section 235.20 sets forth the process for protesting the granting of a carrier application for signal changes or relief from the rules, standards, and instructions. This section provides the information that must be included in the protest, the address for filing the protest, the time limit for filing the protest, and the requirement that a person requesting a public hearing explain the need for such a forum. Section 236.110 requires that the test results of certain signaling apparatus be recorded and specifically identify the tests required under sections 236.102–109; sections 236.377–236.387; sections 236.576; 236.577; and section 236.586–589. Section 236.110 further provides that the test results must be recorded on pre-printed or computerized forms provided by the carrier and that the forms show the name of the railroad, place and date of the test conducted, equipment tested, test results, repairs, and the condition of the apparatus. This section also requires that the employee conducting the test must sign the form and that the record be retained at the office of the supervisory official having the proper

authority. Results of tests made in compliance with sections 236.587 must be retained for 92 days, and results of all other tests must be retained until the next record is filed, but in no case less than one year. Additionally, section 236.587 requires each railroad to make a departure test of cab signal, train stop, or train control devices on locomotives before that locomotive enters the equipped territory. This section further requires that whoever performs the test must certify in writing that the test was properly performed. The certification and test results must be posted in the locomotive cab with a copy of the certification and test results retained at the office of the supervisory official having the proper authority. However, if it is impractical to leave a copy of the certification and test results at the location of the test, the test results must be transmitted to either the dispatcher or one other designated official who must keep a written record of the test results and the name of the person performing the test. All records prepared under this section are required to be retained for 92 days. Finally, section 236.590 requires the carrier to clean and inspect the pneumatic apparatus of automatic train stop, train control, or cab signal devices on locomotives every 736 days, and to stencil, tag, or otherwise mark the pneumatic apparatus indicating the last cleaning date.

Annual Estimated Burden Hours: 480,988 hours.

Title: U.S. DOT Crossing Inventory Form.

OMB Control Number: 2130–0017.

Type of Request: Extension of a currently approved collection.

Affected Public: Railroads.

Abstract: Form FRA F 6180.71 is a voluntary form, and is used by States and railroads to periodically update certain site specific highway-rail crossing information which is then transmitted to FRA for input into the National Inventory File. This information has been collected on the U.S. DOT–AAR Crossing Inventory Form (previous designation of this form) since 1974 and maintained in the National Inventory File database since 1975. The primary purpose of the National Inventory File is to provide for the existence of a uniform database which can be merged with accidents data and used to analyze information for planning and implementation of crossing safety programs by public, private, and governmental agencies responsible for highway-rail crossing safety. Following the official establishment of the National Inventory in 1975, the Federal Railroad

Administration (FRA) assumed the principal responsibility as custodian for the maintenance and continued development of the U.S. DOT/AAR National Highway-Rail Crossing Inventory Program. The major goal of the Program is to provide Federal, State, and local governments, as well as the railroad industry, information for the improvement of safety at highway-rail crossings. Good management practices necessitate maintaining the database with current information. The data will continue to be useful only if maintained and updated as inventory changes occur. FRA previously cleared the reporting and recordkeeping burden for this form under Office of Management and Budget (OMB) Clearance Number 2130–0017. OMB approved the burden for this form through August 31, 2009. FRA is requesting a new three year approval from OMB for this information collection.

Form Number(s): Form FRA F 6180.71.

Annual Estimated Burden Hours: 3,655 hours.

ADDRESSES: Send comments regarding these information collections to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 Seventeenth Street, NW., Washington, DC 20503, Attention: FRA Desk Officer. Alternatively, comments may be sent via e-mail to the Office of Information and Regulatory Affairs (OIRA), Office of Management and Budget, at the following address: oira_submissions@omb.eop.gov.

Comments are invited on the following: Whether the proposed collections of information are necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimates of the burden of the proposed information collections; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collections of information on respondents, including the use of automated collection techniques or other forms of information technology.

A comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication of this notice in the **Federal Register**.

Authority: 44 U.S.C. 3501–3520.

Issued in Washington, DC, on May 7, 2009.

Kimberly Orben,

Director, Office of Financial Management, Federal Railroad Administration.
