

thinnings would use ground-based and skyline logging systems in both the matrix, riparian reserve, and late successional reserve (LSR) land allocations and would generate an estimated 90 million board feet of timber. Within the late successional reserve, canopy closure would be maintained at about 60% on the approximate 2,850 acres thinned in the LSR to maintain its ability to function as spotted owl habitat. All perennial streams would have a no harvest buffer of 50 feet or greater to protect the primary shade zone. Final no harvest riparian buffers will be designated prior to the Draft EIS and will further reduce the number of acres thinned.

- Treating activity-created fuels (slash) on commercially thinned areas by underburning, machine piling, masticating, handpile burning, lopping and scattering, yarding tops attached or whole tree yarding, or using a combination of the above.
- Non-commercial treatment and/or removal of fuels on about 4,400 acres by non-commercial thinning, mastication, whip felling, chipping, and piling and burning of slash.
- Using prescribed fire to reduce fuels as the primary treatment method on about 813 acres.
- Using about $\frac{1}{8}$ of a mile of an existing, unclassified temporary road to access thinning areas then decommissioning after use.
- Building a total of about 27 miles of new temporary spur roads to provide access for logging machinery and for accessing stands for non-commercial treatments, then obliterating them after use.
- Re-opening about 0.5 miles of currently closed system road to provide access to stands, then closing them after use.
- Reconstructing and repairing portions of existing system roads (work would occur along small sections of these roads) including: Road re-alignment; intersection improvement; road widening; slide and/or slump repair; placing or replacing surface rock; reshaping road beds; culvert replacement, and hazard tree felling.
- Maintaining about 88 miles of existing roads including: Grading and shaping of existing road surfaces; dust abatement using magnesium chloride or water; blading road beds and ditches; hazard tree felling; cleaning/maintaining ditches as needed; opening and re-closing existing closed roads; removing debris from the roadway; and cutting of intruding vegetation along roadsides.
- Utilizing the existing Peavine, Brownie, and Stauch Ranch rock pits

(including drilling, blasting, rock crushing and rock hauling), along with several rock disposal sites as the rock source for the road work.

- Other connected and similar actions would also be implemented, including noxious weed treatment, pre-commercial thinning, expansion of the Peavine pit, and sump improvement.

Forest Plan Amendments

The 1990 Umpqua National Forest Land and Resource Management Plan (LRMP) would be amended in the following areas:

1. The LRMP does not permit timber harvest in Management Areas 1, except in the event of catastrophic damage; there are about 36 acres of potential commercial treatment planned in MA 1 in order to reduce fuels in the Wildland Urban Interface (WUI) area. The LRMP would be amended to potentially allow timber harvest and tree removal to help reduce the fire risk in the WUI and to allow for more than one year of recovery to the Visual Quality Objective of Retention.
2. The LRMP excludes timber harvest around unique habitats for a distance of 150 feet. The LRMP would be amended to allow for fuel reduction treatments adjacent to some unique habitats in order to reduce existing and predicted fuel loads.

Possible Alternatives

The alternatives to be considered include the No Action Alternative, the Proposed Action, and another alternative that may be developed if scoping identifies any issues with the proposed action.

Lead and Cooperating Agencies

The USDA Forest Service, Umpqua National Forest is the lead agency.

Responsible Official

Clifford J. Dils, Forest Supervisor of the Umpqua National Forest, is the responsible official for this project. The address for the Umpqua National Forest is 2900 NW Stewart Parkway, Roseburg, OR 97471.

Nature of Decision To Be Made

The Forest Supervisor of the Umpqua National Forest will decide whether to implement the action as proposed, whether to take no action at this time, or whether to implement any alternatives that are proposed. The Forest Supervisor will also decide whether to amend the 1990 Umpqua National Forest Land and Resource Management Plan, if an action alternative is chosen.

Preliminary Issues

At this time, no preliminary issues have been identified.

Scoping Process

This notice of intent initiates the scoping process which guides the development of the environmental impact statement. The project has also been listed in the quarterly schedule of proposed actions (SOPA) since January of 2009. A scoping packet, detailing the proposed action, along with maps of the proposal, will be mailed to over 125 interested publics in May of 2009. The scoping effort is intended to identify issues, which may lead to the development of alternatives to the proposed action. Issues that are raised with the proposal may lead to alternative ways to meet the purpose and need of the project.

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions. The submission of timely and specific comments can affect a reviewer's ability to participate in subsequent administrative appeal or judicial review.

Dated: May 21, 2009.

Clifford J. Dils,

Forest Supervisor.

SUPPLEMENTARY INFORMATION:

Overview

Federal Agency: Rural Business-Cooperative Service (Rural Development).

Solicitation Opportunity Title: Rural Business Enterprise Grants.

Announcement Type: Initial Solicitation Announcement.

Catalog of Federal Domestic Assistance Number: 10.769.

Dates: Application Deadline: Completed applications must be received in the USDA Rural Development State Office no later than July 13, 2009, to be eligible for FY 2009 grant funding. Applications received after this date will not be eligible for FY 2009 grant funding.

I. Funding Opportunity Description

The RBEG program is authorized by section 310B(c)(2) of the Consolidated Farm and Rural Development Act (CONACT) (7 U.S.C. 1932(c)(2)). Regulations are contained in 7 CFR part 1942, subpart G. The primary objective of the program is to improve the economic conditions of rural areas. The program is administered on behalf of RBS at the State level by the USDA Rural Development State Offices. Assistance provided to rural areas under this program may include on-site technical assistance to local and regional governments, public transit agencies, and related non-profit and for-profit organizations in rural areas; the development of training materials; and the provision of necessary training assistance to local officials and agencies in rural areas.

Awards under the RBEG passenger transportation program will be made on a competitive basis using specific selection criteria contained in 7 CFR part 1942, subpart G, and in accordance with section 310B(c)(2) of the CONACT. Information required to be in the application package includes Forms SF 424, “Application for Federal Assistance;” RD 1940–20, “Request for Environmental Information;” Scope of Work Narrative; Income Statement; Balance Sheet or Audit for previous 3 years; AD–1047, “Debarment/Suspension Certification;” AD–1048, “Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion;” AD–1049, “Certification Regarding Drug-Free Workplace Requirements;” Restrictions on Lobbying; RD 400–1, “Equal Opportunity Agreement;” RD 400–4, “Assurance Agreement;” Letter stating Board authorization to obtain assistance; and Letter certifying citizenship, as referenced in 7 CFR 1942.307(b). For the FRNAT grant, which must benefit

Federally Recognized Native American Tribes, at least 75 percent of the benefits of the project must be received by members of Federally Recognized Native American Tribes. The project that scores the greatest number of points based on the RBEG selection criteria and the discretionary points will be selected for each grant. Applications will be tentatively scored by the State Offices and submitted to the National Office for review, final scoring, and selection.

Applicants must be qualified national non-profit organizations with experience in providing technical assistance and training to rural communities for the purpose of improving passenger transportation service or facilities. To be considered “national” RBS requires a qualified organization to provide evidence that it operates rural transportation assistance programming in multiple States. There is not a requirement to use the grant funds in a multi-State area. Under this notice, grants will be made to qualified, private, non-profit organizations for the provision of technical assistance and training to rural communities for the purpose of improving passenger transportation services or facilities.

Definitions

The definitions are published at 7 CFR 1942.304.

All projects to receive technical assistance through these passenger transportation grant funds are to be identified when the applications are submitted to the USDA Rural Development State Office. Multiple project applications must identify each individual project, indicate the amount of funding requested for each individual project, and address the criteria as stated above for each individual project.

For multiple-project applications, the average of the individual project scores will be the score for that application.
