Title: Evaluation and Accountability Reports for Title II, Part D of ESEA.

Abstract: This submission requests emergency approval to require States to submit to the Department two written reports: (1) The State's most recent Ed Tech evaluation report; and (2) A description of the States System of Accountability for Ed Tech funds which will include: (a) A description of how the SEA will ensure, for school years (SYs) 2009–2010 and 2010–2011, that LEAs and eligible local entities that receive Ed Tech funds (either competitively or by formula) are meeting their evaluation responsibilities; and (b) a description of the process and accountability measures that the SEA will use, for SYs 2009–2010 and 2010–2011, to evaluate the effectiveness of Ed Tech-supported activities.

Additional Information: Approval is needed by June 30, 2009 so that the Department can issue relevant program guidance and accountability reporting requirements on July 1, 2009, when the Department issues the Title II, D ARRA grant awards. The Department has had to work under extremely tight timelines to develop program reporting requirements consistent with the unprecedented accountability and transparency ARRA demands. The Department wants to apprise States of the reporting requirements as soon as possible so that States will have sufficient time to comply. Issuing the reporting requirements along with the awards on July 1 gives States approximately 90 calendar days to comply with the requirements.

DEPARTMENT OF ENERGY

Western Area Power Administration

Amistad and Falcon Projects Rate Order No. WAPA–143

AGENCY: Western Area Power Administration, DOE.

ACTION: Notice of Order Concerning a Power Rate Formula.

SUMMARY: The Deputy Secretary of Energy confirmed and approved Rate Order No. WAPA–143 placing a power rate formula for the Amistad and Falcon Projects of the Western Area Power Administration (Western) into effect on an interim basis. The provisional power rate formula will be in effect on an interim basis until the Federal Energy Regulatory Commission (FERC) confirms, approves, and places it into effect on a final basis, or until the power rate formula is replaced by another power rate formula.

DATES: The provisional rate formula will be placed into effect on an interim basis on June 8, 2009, and will be in effect until the FERC confirms, approves, and places the provisional rate formula into effect on a final basis through June 7, 2014, or until superseded.

FOR FURTHER INFORMATION CONTACT: Mr. Bradley S. Warren, CRSP Manager, Colorado River Storage Project Management Center, Western Area Power Administration, 150 East Social Hall Avenue, Suite 300, Salt Lake City, UT 84111–1580, (801) 524–5493, e-mail warren@wapa.gov, or Ms. Carol Loftin, Rates Manager, Colorado River Storage Project Management Center, Western Area Power Administration, 150 East Social Hall Avenue, Suite 300, Salt Lake City, UT 84111–1580, (801) 524–6380, e-mail loftinc@wapa.gov.

SUPPLEMENTARY INFORMATION: The Amistad and Falcon Dams are features

of international water storage projects located on the Rio Grande River between Texas and Mexico. Under the terms of Contract No. 7–07–50–P0890 (Contract) dated August 9, 1977, Western marketed the power from these dams to two electric cooperatives, South Texas Electric Cooperative, Inc. (STEC or Customer), and Medina Electric Cooperative (MEC). Under an October 19, 1995, amendment to the Contract, MEC notified Western that it had transferred its generation and transmission facilities to STEC and would be a distribution cooperative served by STEC and requested that MEC's interest in the Contract be assigned to STEC. Western approved the Contract amendment. The power rate formula of the Contract was approved by the Federal Power Commission (FPC), predecessor to FERC, in Docket No. E–9566 on August 12, 1977 (59 FPC 1653), for a 5-year period effective on the date of initial operation of the Amistad Power Plant, June 8, 1983.¹

According to article 9(a) of the Contract, Western calculates the annual installment to be paid by the Customer, for the power generated at the Amistad and Falcon power plants on or before August 31 of the year preceding the fiscal year to which it pertains, and codifies this amount in a revised Exhibit A to the Contract. Each annual installment pays the annual amortized portion of the United States' investment in the Amistad and Falcon hydroelectric facilities with interest, and the associated operation, maintenance, and administrative costs. This repayment schedule is not dependent upon the power and energy made available for sale or the rate of generation each year.

By Delegation Order No. 00–037.00, effective December 6, 2001, the Secretary of Energy delegated: (1) The authority to develop power and transmission rates to Western's Administrator, (2) the authority to confirm, approve, and place such rates into effect on an interim basis to the Deputy Secretary, and (3) the authority to confirm, approve, and place into effect on a final basis, to remand, or to disapprove such rates to FERC. Existing Department of Energy procedures for public participation in power rate adjustments (10 CFR 903) were published on September 18, 1985.

¹ A 5-year rate renewal of this same rate formula through June 7, 1993, was approved by FERC on July 20, 1988, at 44 FERC ¶ 62,058. Subsequent 5-year renewals of the rate formula have been approved by FERC. The most recent approval was on January 31, 2005, in Docket No. EF04–5101–000, which approved the same rate formula through June 7, 2009 (110 FERC ¶ 62,083).
