Background and Purpose

We have prepared a Final Programmatic Environmental Impact Statement (FPEIS) for the rulemaking entitled Vessel and Facility Response Plans for Oil: 2003 Removal Equipment Requirements and Alternative Technology Revisions (1625-AA26). See "Viewing the comments and the FPEIS" above. The FPEIS examines the reasonable alternatives and potential environmental impacts from an increase of oil removal capability requirements for tank vessels and marine transportation-related (MTR) facilities. The FPEIS recommends Alternative 5 as the preferred alternative for increasing oil removal capability. Alternative 5 would require spill removal plan holders to maintain on-water mechanical recovery capability at current levels, establish a dispersant application capability, and establish aerial tracking capability. We are requesting your comments on environmental concerns that you may have related to the FPEIS.
