Title: NESHAP for Clay Ceramics Manufacturing (Renewal).

ICR Numbers: EPA ICR Number 2023.04, OMB Control Number 2060-0513.

ICR Status: This ICR is scheduled to expire on August 31, 2009. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the

related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Clay Ceramics Manufacturing (40 CFR part 63, subpart KKKKK) were proposed on July 22, 2002 (67 FR 47893) and promulgated on May 16, 2003 (67 FR 26738).

The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the General Provisions specified at 40 CFR part 63, subpart KKKKK.

Owners or operators of the affected facilities must submit a one-time-only report of any physical or operational changes, initial performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 17 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Clay ceramics manufacturing facilities.

Estimated Number of Respondents: 10.

Frequency of Response: Initially, occasionally, and semiannually.

Estimated Total Annual Hour Burden: 527.

Estimated Total Annual Cost: \$45,702, which includes labor costs of \$42,532, O&M costs of \$2,468, and annualized capital/startup costs of \$702.

Changes in the Estimates: There is no change in the total estimated burden

currently identified in the OMB Inventory of Approved ICR Burdens. Apparent differences of less than 500 hours are attributable to rounding; in previous years, hours were rounded to the nearest thousand; this ICR presents more exact figures.

Dated: June 26, 2009.

Director, Collection Strategies Division.

Title: Auto Body Compliance Assessment Pilot Project (New).

ICR Numbers: EPA ICR No. 2344.01, OMB Control No. 2020-NEW.

ICR Status: This ICR is for a new information collection activity. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on

the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The purpose of the ICR is two-fold. First, it is to authorize the collection of information as part of a pilot study undertaken by EPA to evaluate whether and how EPA's specific compliance assistance activities in Region 1 helped owners or operators of auto body shops improve their operations. The ICR would authorize the administration of surveys, by telephone and on-site, to a random sample of auto body shops subject to National Emission Standards for Hazardous Air Pollutants: Paint Stripping and Miscellaneous Surface Coating Operations at Area Sources (NESHAP Subpart HHHHHH, hereinafter referred to as the Surface Coating Rule.). Specifically, the study has been designed to assess whether or not the assistance provided helped owners or operators understand these and other applicable environmental regulations, and whether or not the assistance helped owners or operators implement operational changes that improved environmental practices; including changes in behavior that resulted in the auto body shop either returning to compliance with regulations or taking steps toward achieving compliance. EPA has two objectives in collecting this information for the pilot study: (1) EPA's primary objective is to assess the degree to which its compliance assistance activities can be correlated to improved environmental performance at auto body shops; (2) EPA's secondary objective is to assess the validity of environmental performance information collected by telephone surveys. The Agency frequently relies on telephone surveys to gather information about environmental performance, but such self-reported data may not be accurate, and may suffer from non-response bias. The design for this study addresses both concerns.

The second use for this ICR is to authorize the use of these surveys to collect anecdotal information as part of the Agency's efforts to assess outcomes associated with the Office of Air Quality Planning and Standard's Collision Repair Campaign (CRC). The CRC is a two-year campaign during which the EPA Headquarters Office of Air Quality Planning and Standards (OAQPS) and the ten EPA Regions will address health threats by reducing toxic auto body coating emissions at the national level. Each EPA regional office involved in the campaign will work with its respective partners (*e.g.*, community, industry,
