SUPPLEMENTARY INFORMATION:

Background: In a separate notice of proposed rulemaking, EPA proposed a regulation to implement changes to the Renewable Fuel Standard program as mandated by the Clean Air Act (as amended by Sections 201, 202, and 210 of the Energy Independence and Security Act of 2007). The revised statutory requirements specify the volumes of cellulosic biofuel, biomass-based diesel, advanced biofuel, and total renewable fuel that must be used in transportation fuel each year, with the volumes increasing over time. The rule proposed regulations designed to ensure that refiners, blenders, and importers of gasoline and diesel would use enough renewable fuel each year so that the four volume requirements of the Energy Independence and Security Act would be met with renewable fuels that also meet the required lifecycle greenhouse gas emissions performance standards. The RFS2 proposed rule describes the standards that would apply to these parties, the lifecycle greenhouse gas modeling, and the renewable fuels that would qualify for compliance. The proposed regulations also make a number of changes to the current Renewable Fuel Standard program

while retaining many elements of the compliance and trading system already in place.

Extension of Comment Period: EPA received requests for an extension of the RFS2 public comment period from various parties ranging from 60 to 120 days. EPA also received a request to not extend the comment period, and to continue with the schedule as proposed. After considering all of these comments, EPA has determined that an extension of the comment period would provide the public adequate time to provide meaningful comment on the proposed rule. However, this need must be balanced against our desire to finalize and implement the new standards in a timely manner. EPA believes that an additional 60 days is an appropriate amount of time to balance these needs. Accordingly, the public comment period for the RFS2 proposed rulemaking is extended until September 25, 2009. EPA does not anticipate any further extension of the comment period at this time.

CB Docket No. 09-102.

Released: June 24, 2009

1. Pursuant to the Regulatory Flexibility Act (RFA), *see* 5 U.S.C. section 610, the FCC hereby publishes a plan for the review of rules adopted by the agency in calendar year 1998 which have, or might have, a significant economic impact on a substantial number of small entities. The purpose of the review is to determine whether such rules should be continued without change, or should be amended or rescinded, consistent with the stated objectives of section 610 of the RFA, to minimize any significant economic impact of such rules upon a substantial number of small entities.

2. This document lists the FCC regulations to be reviewed during the next twelve months. In succeeding years, as here, the Commission will publish a list for the review of regulations promulgated ten years preceding the year of review.

3. In reviewing each rule in a manner consistent with the requirements of section 610 the FCC will consider the following factors:

- (a) The continued need for the rule;
- (b) The nature of complaints or comments received concerning the rule from the public;
- (c) The complexity of the rule;
- (d) The extent to which the rule overlaps, duplicates, or conflicts with other federal rules and, to the extent feasible, with State and local governmental rules; and
- (e) The length of time since the rule has been evaluated or the degree to which technology, economic conditions, or other factors have changed in the area affected by the rule.

4. Appropriate information has been provided for each rule, including a brief description of the rule and the need for, and legal basis of, the rule. The public is invited to comment on the rules chosen for review by the FCC according to the requirements of section 610 of the RFA. All relevant and timely comments
