Title: NESHAP for Publicly Owned Treatment Works (Renewal).

ICR Numbers: EPA ICR Number 1891.05, OMB Control Number 2060– 0428

ICR Status: This ICR is schedule to expire on August 31, 2009. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the Federal Register when approved, are listed in 40 CFR part 9, and displayed either by publication in the Federal Register or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Publicly Owned Treatment Works were proposed on December 1, 1998 and promulgated on October 26, 1999. These regulations apply to owners or operators of waste treatment processes and operations in the publicly owned treatment works (POTW) source category.

All new sources must be in compliance with subpart VVV upon startup or the promulgation date, whichever is later. Owners and operators of affected sources are subject to the requirements of 40 CFR part 63, subpart A, the General Provisions, unless the regulation specifies otherwise. New sources constructed or reconstructed after the effected date of the standard are required to submit an application for approval of construction or reconstruction

Generally, respondents are required to submit one-time reports of: (1) Start of construction of new facilities, and (2) anticipated and actual startup dates for new facilities. The subpart also requires new affected sources to submit a notification of compliance status.

Emission and control requirements for "existing" industrial POTWs are

specified by the appropriate NESHAP for the industrial user. In addition, there are no control requirements for "existing" non-industrial POTW treatment plants. Therefore, there are no subpart VVV recordkeeping or reporting requirements for "existing" sources covered by this ICR.

Any owner or operator subject to the provisions of this subpart must maintain a file of these measurements, and retain the file for at least five years following the collection of such measurements, maintenance reports, and records. All reports are sent to the delegated State or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA regulations listed in 40 CFR part 9 and 48 CFR chapter 15 are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average one hour per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose and provide information to or for a Federal agency. This includes the time needed to review instructions, develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information. All existing ways will have to adjust to comply with any previously applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:
Publicly owned treatment works.
Estimated Number of Respondents: 6.
Frequency of Response: On occasion,
initially, semiannually and annually.
Estimated Total Annual Hour Burden:
14

Estimated Total Annual Cost: \$1,114.06 in labor costs exclusively. There are neither capital/startup nor operation and maintenance costs.

Changes in the Estimates: There is no change in the total estimated burden currently identified in the OMB inventory of Approved ICR Burdens. This is due to two considerations: (1)

The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the current growth rate for the industry is very low, negative or nonexistent, so there is no significant change in the overall burden.

Dated: June 30, 2009.

John Moses,

Director, Collection Strategies Division.

General information about the EPA SAB as well as any updates concerning the meeting announced in this notice, may be found on the SAB Web site at http:// www.epa.gov/sab. Any inquiry regarding EPA's Aging Drinking Water and Wastewater Infrastructure Research Initiative should be directed to Dr. Thomas Speth, EPA Office of Research

and Development (ORD), at speth.thomas@epa.gov or (513) 569–7208.

SUPPLEMENTARY INFORMATION: Pursuant to the Federal Advisory Committee Act, 5 U.S.C., App. 2 (FACA), notice is hereby given that the SAB **Environmental Engineering Committee** augmented with additional experts will hold a public meeting to discuss comments on EPA's Aging Drinking Water and Wastewater Infrastructure Research Initiative. The SAB was established pursuant to 42 U.S.C. 4365 to provide independent scientific and technical advice to the Administrator on the technical basis for Agency positions and regulations. The SAB is a Federal Advisory Committee chartered under FACA. The SAB will comply with the provisions of FACA and all appropriate SAB Staff Office procedural policies.

Background: As discussed in the Federal Register Notice dated March 31, 2009 (74 FR 14553-14555) announcing this advisory activity, EPA's ORD initiated a research program in 2007 to improve and evaluate innovative technologies and techniques for reducing the cost and improving the effectiveness of operations, maintenance, and replacement of aging and failing systems for drinking water and wastewater treatment and conveyance. The outputs from this research program are intended to assist EPA's program and regional offices to implement Clean Water Act and Safe Drinking Water Act requirements; to help states and tribes meet their programmatic requirements; and to assist utilities to more effectively implement comprehensive management of drinking water and wastewater treatment and conveyance systems, provide reliable service to their customers, and meet their statutory requirements. In response to a request from EPA's ORD, the augmented EEC will hold a public meeting to provide comments on the suitability and appropriateness of completed, existing and upcoming research projects; whether additional projects are needed; and the overall scope of the initiative. Additional information about this consultative activity including a meeting agenda will be posted on the SAB Web site prior to the meeting at http://www.epa.gov/sab.

Availability of Meeting Materials: The agenda and other meeting materials will be available on the SAB Web site at http://www.epa.gov/sab in advance of the meeting.

Procedures for Providing Public Input: Interested members of the public may submit relevant written or oral information for the SAB EEC to consider during the advisory process. Oral Statements: In general, individuals or groups requesting an oral presentation at a public face-to-face meeting will be limited to five minutes per speaker, with no more than a total of one hour for all speakers. Each person making an oral statement should consider providing written comments as well as their oral statement so that the points presented orally can be expanded upon in writing. Interested parties should contact Edward Hanlon, DFO, in writing (preferably via e-mail) at the contact information noted above, by July 14, 2009 to be placed on the list of public speakers for the meeting. Written Statements: Written statements should be received in the SAB Staff Office by July 14, 2009 so that the information may be made available to the Committee members for their consideration. Written statements should be supplied to the DFO in the following formats: one hard copy with original signature, and one electronic copy via e-mail (acceptable file format: Adobe Acrobat PDF, WordPerfect, MS Word, MS PowerPoint, or Rich Text files in IBM-PC/Windows 98/2000/XP format). Submitters are requested to provide versions of each document submitted with and without signatures, because the SAB Staff Office does not publish documents with signatures on its Web sites.

Accessibility: For information on access or services for individuals with disabilities, please contact Edward Hanlon at the phone number or e-mail address noted above, preferably at least ten days prior to the public face-to-face meeting to give EPA as much time as possible to process your request.
