BILLING CODE P

DEPARTMENT OF THE INTERIOR**Geological Survey****Privacy Act of 1974, as Amended;
Notice of a New System of Records**

AGENCY: U.S. Geological Survey,
Department of the Interior.

ACTION: Notice of creation of a new
system of records.

SUMMARY: Pursuant to the provisions of the Privacy Act of 1974, as amended (5 U.S.C. 552a), the Department of the Interior (DOI) is issuing a public notice of its intent to create the U.S. Geological Survey "Earthquake Hazards Program Earthquake Information" system of records. The system includes individuals' e-mail addresses, and in some cases their name and address, for Program staff to reply to inquiries from those individuals for dissemination of requested earthquake-related information in real time, and for creating Web-accessible maps of earthquake-shaking by Zip code in real time.

DATES: Comments must be received by August 24, 2009.

ADDRESSES: Any person interested in commenting on this new notice may do so by: Submitting comments in writing to USGS Privacy Act Officer, 12201 Sunrise Valley Drive, MS807, Reston, Virginia 20192; hand-delivering comments to 12201 Sunrise Valley Drive, Reston, Virginia 20192; or e-mailing comments to dkimball@usgs.gov. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

FOR FURTHER INFORMATION CONTACT: U.S. Geological Survey Privacy Act Officer, Deborah Kimball, 12201 Sunrise Valley Drive, Reston, Virginia 20192 by e-mail to dkimball@usgs.gov, or by phone at (703) 648-7158.

SUPPLEMENTARY INFORMATION: U.S. Geological Survey maintains the Earthquake Hazards Program Earthquake Information system of records. The purpose of this system is to make earthquake information available to members of the public who request to participate in exchanges of earthquake information by e-mail notification, Web site publications, and real-time data pushes/pulls to clients. The new system will be effective as proposed at the end of the comment period (the comment period will end 40 days after the publication of this notice in the **Federal Register**), unless comments are received which would require a contrary determination. DOI will publish a revised notice if changes are made based upon a review of the comments received.

USGS Privacy Act Officer.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

All records are maintained in a relational MySQL database stored on hard disk on each of the Web servers in Golden, CO; Denver, CO; Menlo Park, CA; Pasadena, CA; Sioux Falls, SD, and backed up on magnetic tape. Electronic requests sent to the "Web Team" e-mail contact designated in the footer of every Web page on the Earthquake Hazards Program Web site, which contains the return e-mail address of the inquirer, are deleted as soon as a response to the inquiry is sent to the inquirer.

RETRIEVABILITY:

All data in the database can be accessed by the database administrators by any mandatory field, which includes e-mail address or account name.

SAFEGUARDS:

(1) *Physical Security:* The systems are physically housed in Government offices consisting of locked rooms with floor to ceiling walls. Access is granted through a proximity card system. Backup tapes are stored at the Denver Federal Center in Building 25 in Room 1860, with access granted through a proximity card system, and in Menlo Park Building 11 and 3, with access granted through a proximity card system.

(2) *Technical Security:* Electronic records are maintained in conformity with Office of Management and Budget, National Institute of Standards Technology and Departmental requirements reflecting the implementation of the Federal Information Security Management Act. Electronic data is protected through user identification, passwords, database permissions, a Privacy Act Warning, and software controls. These security measures establish different degrees of access for different types of users. The security controls protecting these databases are implemented in a hierarchical manner. The top layer is the Department of the Interior's Enterprise Services Network (ESN) security infrastructure which includes

firewalls maintained in accordance with Department of Interior standards, Active-Scout Intrusion Detection, and a Juniper Intrusion Detection and Prevention (IDP) system. Additional security methods are implemented at each site: Firewalls, SSH, TCPwrappers, and Microsoft Active Directory. In addition to the layers of security described above, database access is controlled by restricted access to <http://usgs.gov> domains and by IP address, system user authentication, database access (table and row level) via grants, and specific database-table access by user account restrictions. Privacy information sent via the Internet is encrypted by SSL. The Security Plan addresses the Department's Privacy Act safeguard requirements for Privacy Act systems at 43 CFR 2.51. A Privacy Impact Assessment was completed to ensure that Privacy Act requirements and safeguards are sufficient and in place. Its provisions will be updated as needed to ensure that Privacy Act requirements continue to be met.

(3) *Administrative Security:* Access is strictly limited to authorized personnel whose official duties require such access. All Departmental and contractor employees with access to the records are required to complete Privacy Act, Federal Records Act, and Information Technology Security Awareness training prior to being given access to the system, and on an annual basis, thereafter. All users sign security forms stating they will neither misuse government computers nor the information contained therein. In addition, managers and supervisors of users monitor the use of the database and ensure that the information is used in accordance with certified and accredited business practices.

RETENTION AND DISPOSAL:

The records in the system are retained and disposed of in accordance with National Archives and Records Administration procedures and General Records Schedule 308-01 and 310-01.
