Animal and Plant Health Inspection Service

Title: National Animal Health Reporting System (NAHRS).

OMB Control Number: 0579-0299.

Summary of Collection: The National Animal Health Reporting System (NAHRS) was developed through a cooperative effort between the United States Animal Health Association, the American Association of Veterinary Laboratory Diagnosticians, and the Animal and Plant Health Inspection Service (APHIS). NAHRS provides an ongoing national measure of the health status of the nation's livestock. The National Center for Animal Health Surveillance involvement in this voluntary monitoring activity is to facilitate standardization of the data throughout the United States and provide a central point for national collection. The evolving international trade arena and increased competition have heightened the need to have accurate, timely information to maintain and increase U.S. animal agriculture's overseas market share. NAHRS provides information that helps meet this need.

Need and Use of the Information: The objective of the NAHRS is to collect data needed to report the presence of confirmed clinical disease in commercial livestock, poultry, and aquaculture species in the U.S. These reports are required for membership by

the Office International des Epizooties, and to meet international trade reporting requirements for animal health. On a monthly basis State veterinarians in each of the 50 States are asked to complete the NAHRS Reportable Disease List Form. The form collects qualitative data from reporting States on the confirmed presence or absence of diseases, but does not collect or report the number of cases.

Description of Respondents: State, Local, or Tribal Government.

Number of Respondents: 50.

Frequency of Responses: Reporting: Annually.

Total Burden Hours: 2,400.
