Title: Voluntary Children's Chemical Evaluation Program (VCCEP).

ICR Numbers: EPA ICR No. 2055.03, OMB Control No. 2070-0165.

ICR Status: This ICR is currently scheduled to expire on July 31, 2009. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9. **Abstract:** VCCEP is a voluntary program intended to provide data to enable the public to understand the potential health risks to children associated with certain chemical exposures. EPA has asked companies that manufacture and/or import 20 chemicals that have been found in human tissues and the environment to volunteer to sponsor their evaluation in VCCEP. VCCEP consists of three tiers that a sponsor may commit to separately. As part of their sponsorship, companies submit commitment letters, collect and/or develop health effects and exposure information on their chemical(s), integrate that information in a risk assessment, and develop a "Data Needs Assessment." The Data Needs Assessment discusses the need for additional data, which could be provided by the next tier, to fully characterize the risks the chemical may pose to children.

The information submitted by the sponsor will be evaluated by a group of scientific experts with extensive, relevant experience in toxicity testing and exposure evaluations, a Peer Consultation Group. This Group will forward its opinions to EPA and the

sponsor(s) concerning the adequacy of the assessments and the need for development of any additional information to fully assess risks to children. EPA will consider the opinions of the Peer Consultation and announce whether additional higher tier information is needed. Sponsors and the public will have an opportunity to comment on EPA's decision concerning data needs. EPA will consider these comments and issue a final decision. If the final decision is that additional information is needed, sponsors will be asked to volunteer to provide the next tier of information. If additional information is not needed, the risk communication and, if necessary, risk management phases of the program will be initiated.

Responses to the collection of information are voluntary. Respondents may claim all or part of a notice confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average about 549 hours per response. Burden means the total time, effort or financial resources expended by persons to generate, maintain, retain or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install and utilize technology and systems for the purposes of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Entities potentially affected by this ICR are manufacturers or importers of certain chemicals who have volunteered to sponsor chemicals in the VCCEP.

Frequency of Collection: On occasion.

Estimated average number of responses for each respondent: 6.4.

Estimated No. of Respondents: 32.

Estimated Total Annual Burden on Respondents: 112,456 hours.

Estimated Total Annual Costs: \$10,904,472.

Changes in Burden Estimates: There is an increase of 6,200 hours (from 106,256 hours to 112,456 hours) in the

total estimated respondent burden compared with that currently in the OMB inventory. This change is an adjustment and is related to a projected increase to the estimated number of responses. The Supporting Statement provides additional detail concerning the changes in burden estimates.

Dated: July 13, 2009.

John Moses,

Director, Collection Strategies Division.
