

To support this growth, a multi-year, major construction effort would occur at all three installations. Proposed infrastructure development at each installation (at least to some extent) includes: Constructing administrative, educational, training, maintenance, and operations facilities; providing living accommodations (housing, lodging, and mess halls); building Morale, Welfare, and Recreation facilities (fitness centers, medical/dental clinics, child development centers); demolishing existing buildings and infrastructure; and constructing and/or upgrading infrastructure (e.g., roads, power, and communications). Proposed development would result in approximately 1,700 acres of disturbance at MCB Camp Lejeune, 160 acres at MCAS New River, and 117 acres at MCAS Cherry Point.

Under Alternative 3 the same permanent increase of Marines and dependents would occur at the three North Carolina Installations as described for the Preferred Alternative; however, a reduced construction effort would be implemented. This alternative meets the purpose and need to establish the Marine Corps personnel increases on a permanent basis; however, once deployments are curtailed and Marines return to their home stations from abroad, infrastructure capacity to support all the Marines would be considerably strained at the three Installations. Under this alternative proposed development would result in approximately 360 acres of disturbance at MCB Camp Lejeune, 90 acres at MCAS New River, and 40 acres at MCAS Cherry Point.

Under Alternative 4, the same permanent increase of Marines and dependents would occur at the three Installations as described in the Preferred Alternative; however, no construction projects or infrastructure development would occur. The increased personnel would be accommodated in existing facilities or temporary/relocatable buildings already in place. The purpose and need for the Proposed Action would be met; however, by not implementing any construction projects or upgrades, infrastructure capacity to support all the Marines would be considerably strained at all three Installations.

Environmental resources addressed in the Draft EIS include land use and coastal zone management; socioeconomic; recreation and visual resources; community services and facilities; transportation and traffic; utilities and infrastructure; hazardous materials, toxic substances, and hazardous waste; noise; air quality;

natural resources, including threatened and endangered species; earth resources (e.g., soils and geology); water resources (e.g., surface waters and wetlands); and cultural resources. The Draft EIS also accounts for cumulative impacts from other past, present, and reasonably foreseeable future actions in the Jacksonville and Havelock, North Carolina regional area.

The Draft EIS analyses indicate that the proposed personnel increases would substantially increase the population residing on the three Marine Corps installations, as well as the population within the surrounding communities of Onslow, Craven, and Carteret counties. Onslow and Craven counties are anticipated to receive 95 percent of the growth directly associated with the proposed action. The influx of personnel would have direct impacts (but not at a magnitude to introduce major adverse effects) to socioeconomic, community services (specifically schools in Onslow County), utilities, and local traffic. The Preferred Alternative would, however, introduce positive input into the local economy from economic gains associated with military salaries and taxes (long-term gain) and major construction efforts (short-term gain).

The proposed construction and demolition would have adverse impacts to cultural resources at MCB Camp Lejeune (demolition of three historic buildings). Mitigation measures will be developed in consultation with the North Carolina State Historic Preservation Officer. Proposed construction also has the potential to impact wetlands at all three installations. However, these impacts are not anticipated to be significant due to the best management practices utilized by the Marine Corps.

Schedule: A Notice of Availability (NOA) of the Draft EIS will be published both in the **Federal Register** and local print media, which starts the 45-day public comment period for the Draft EIS. The Marine Corps will consider and respond to all comments received on the Draft EIS when preparing the Final EIS. The Department of the Navy intends to issue the Final EIS no later than December 2009, at which time a NOA will be published in the **Federal Register** and local media. A Record of Decision will be issued no sooner than 30 days following publication of the Final EIS.

Dated: July 14, 2009.

Lieutenant Commander, Judge Advocate General's Corps, U.S. Navy, Federal Register Liaison Officer.
