Form of TCCULGP Assignment

The undersigned is the holder ("Holder") or a duly authorized representative ("Representative") of a holder or holders of Temporary Corporate Credit Union Stabilization Fund ("TCCUSF") guaranteed debt under the _____ [insert title of governing document and CUSIP Number, if any] dated _____ [insert month, day and year] by and between _____ Credit Union ("Issuer"), as the Issuer, and the undersigned (as amended from time to time, the "Agreement"), pursuant to which the TCCUSF-guaranteed debt obligations were issued by _____ Credit Union and are now outstanding. The undersigned Holder, or Representative on behalf of all holders, has demanded payment of amounts due and payable, and that are now in default, such default not having been cured as of the date hereof.

In conjunction with that demand, the undersigned Holder, or Representative on behalf of all holders, has executed and submits this Assignment made pursuant to the terms of Section [] of the Agreement. Capitalized terms used herein and not otherwise defined herein shall have the meanings assigned thereto in the Agreement.

For value received, the undersigned Holder, or Representative on behalf of all holders, (the "Assignor"), hereby assigns to the National Credit Union Administration ("NCUA") TCCUSF, without recourse, all of the Assignor's respective rights, title and interest in and to: (a) The promissory note or other instrument evidencing the debt issued under the Agreement (the "Note"); (b) the Agreement pursuant to which the Note was issued; and (c) any other instrument or agreement executed by the Issuer regarding obligations of the Issuer under the Note or the Agreement (collectively, the "Assignment").

The Assignor acknowledges and agrees that this Assignment is subject to the Agreement and to the following:

1) In the event the Assignor receives any payment under or related to the Note or the Agreement from a party other than the TCCUSF (a "Non-TCCUSF Payment"):

a. After the date of demand for a guarantee payment on the TCCUSF pursuant to the TCCULGP, but prior to the date of the TCCUSF's first guarantee payment under the Agreement, the Assignor shall promptly but in no event later than five (5) Business Days after the receipt notify the TCCUSF of the date and the amount of such Non-TCCUSF Payment and shall apply such payment as payment made by the Issuer, and not as a guarantee payment made by the TCCUSF under the TCCULGP, and therefore, the

amount of such payment shall be excluded from this Assignment; and

b. After the TCCUSF's first guarantee payment under the Agreement, the Assignor shall forward promptly to the TCCUSF such Non-TCCUSF Payment in accordance with the payment instructions provided in writing by the TCCUSF.

2) Acceptance by the Assignor of payment pursuant to the TCCULGP for its own behalf, or in the case of a Representative Assignor, on behalf of the holders, shall constitute a release by such Holder or holders of any liability of the TCCUSF and the NCUA under the TCCULGP with respect to such payment.

The person who is executing this Assignment on behalf of the Assignor hereby represents and warrants to the NCUA and the TCCUSF that he/she/it is duly authorized to do so.

IN WITNESS WHEREOF, the Assignor has caused this instrument to be executed and delivered this ____ day of ____, 20__.

Very truly yours,

[Assignor]

NATIONAL SCIENCE FOUNDATION**Agency Information Collection Activities: Comment Request**

AGENCY: National Science Foundation.

ACTION: Submission for OMB review; comment request.

SUMMARY: The National Science Foundation (NSF) has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1995, Pub. L. 104-13. This is the second notice for public comment; the first was published in the **Federal Register** at 74 FR 23219, and no comments were received. NSF is forwarding the proposed renewal submission to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice. The full submission may be found at: <http://www.reginfo.gov/public/do/PRAMain>. Comments regarding (a) whether the collection of information is necessary

for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; or (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to: Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for National Science Foundation, 725-17th Street, NW., Room 10235, Washington, DC 20503, and to Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Suite 295, Arlington, Virginia 22230 or send e-mail to splimpto@nsf.gov. Comments regarding this information collection are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling 703-292-7556.

FOR FURTHER INFORMATION CONTACT:

Suzanne H. Plimpton at 703-292-7556 or send email to splimpto@nsf.gov.

Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

SUPPLEMENTARY INFORMATION:

Title of Collection: Implementation Evaluation of the ADVANCE Program.
OMB Control No.: 3145-NEW.

Abstract:

The ADVANCE Program was established by the National Science Foundation in 2001 to address the underrepresentation and inadequate advancement of women on STEM (Science, Technology, Engineering, and Mathematics) faculties at postsecondary institutions. The evaluation being conducted by the Urban Institute focuses on the implementation of ADVANCE projects at institutions

throughout the nation. The three major funding components—institutional transformation, leadership, and partnership awards—as well as all cohorts funded that completed their funding cycles will be included. The study will rely on a thorough review of project documents, telephone interviews with all grantees, and detailed case studies at selected sites. The goal of the evaluation will be to identify models of implementation and, depending on outcomes by model, conduct case studies at selected institutions to understand how ADVANCE models operate and may be effective in differing settings.

Respondents: Faculty and staff at institutions of higher education awarded an ADVANCE grant from NSF.

Estimated Number of Annual Respondents: 200 (total).

Burden on the Public: 200 hours.

Dated: July 17, 2009.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-219; NRC-2009-0320]

Exelon Generation Company, LLC; Oyster Creek Nuclear Generating Station; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of exemptions from Title 10 of the *Code of Federal Regulations* (10 CFR) Part 50, Appendix R, Section III.G, “Fire Protection of Safe Shutdown Capability,” for Renewed Facility Operating License No. DPR-16, for the use of operator manual actions in lieu of the requirements specified in Section III.G.2, as requested by Exelon Generation Company, LLC (the licensee), for operation of the Oyster Creek Nuclear Generating Station (Oyster Creek), located in Ocean County, New Jersey. Therefore, as required by 10 CFR 51.21, the NRC is issuing this environmental assessment and finding of no significant impact.

Environmental Assessment

Identification of the Proposed Action

The proposed action would grant exemptions to 10 CFR Part 50, Appendix R, Section III.G.2 based on 20 operator manual actions contained in the licensee’s Fire Protection Program

(FPP). The licensee’s FPP requires that the identified operator manual actions be performed outside of the control room to achieve shutdown following fires in certain fire areas. The licensee states that each of the manual actions were subjected to a manual action feasibility review for Oyster Creek that determined that the manual actions are feasible and can be reliably performed.

The proposed action is in accordance with the licensee’s application dated March 3, 2009 (available in the Agencywide Documents Access and Management System (ADAMS) Accession No. ML090630132).

The Need for the Proposed Action

The proposed exemption from 10 CFR Part 50, Appendix R, was submitted in response to the need for an exemption as identified by NRC Regulatory Information Summary (RIS) 2006-10, “Regulatory Expectations with Appendix R Paragraph III.G.2 Operator Manual Actions.” The RIS noted that NRC inspections identified that some licensees had relied upon operator manual actions, instead of the options specified in Paragraph III.G.2 of 10 CFR Part 50, Appendix R, as a permanent solution to resolve issues related to Thermo-Lag 330-1 fire barriers. The licensee indicates that some of the operator manual actions referenced in the March 3, 2009, application were previously included in correspondence with the NRC and found acceptable in a fire protection-related Safety Evaluation (SE) dated March 24, 1986 (ADAMS Accession No. 8604070468). The remaining operator manual actions referenced were explicitly considered in an SE dated June 25, 1990 (ADAMS Accession No. 9006280092), supporting a separate Appendix R exemption. RIS 2006-10, however, identifies that an exemption under 10 CFR Section 50.12 is necessary for use of the manual actions in lieu of the requirements of 10 CFR Part 50, Appendix R, III.G.2, even if the NRC previously issued an SE that found the manual actions acceptable. RIS 2006-10 and Enforcement Guidance Memorandum 07-004 (ADAMS Accession No. ML071830345) provided that exemption requests must be submitted by March 6, 2009. The licensee’s proposed exemption provides the formal vehicle for NRC approval for the use of the specified operator manual actions instead of the options specified in 10 CFR Part 50, Appendix R, III.G.2.

Environmental Impacts of the Proposed Action

The NRC staff evaluated the manual operator actions presented in the proposed exemption in NRC SEs dated

March 24, 1986, and June 25, 1990, and found that they maintained a safe shutdown capability that satisfies the requirements of 10 CFR Part 50, Appendix R, III.G. Therefore, the proposed action will not significantly increase the probability or consequences of accidents, nor does the proposed action introduce a new or different kind of accident. No changes are being made in the types of effluents that may be released off site. There is no significant increase in the amount of any effluent released off site. None of the manual actions to be performed are in areas that have radiation levels that would preclude entry. Further, the licensee stated that the highest expected dose during performance of the manual actions is 100 millirem (2 percent of the annual occupational limit) and the majority of manual actions are not in radiological controlled areas. Based on this consideration, the NRC staff finds that there is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological impacts associated with the proposed action. The NRC staff, thus concludes that granting the proposed exemption would result in no significant radiological environmental impact.

With regard to potential non-radiological impacts, the proposed action does not have a potential to affect any historic sites. It does not affect non-radiological plant effluents and has no other environmental impact. Therefore, there are no significant non-radiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the NRC staff considered denial of the proposed action (i.e., the “no-action” alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

The action does not involve the use of any different resources than those previously considered in the 1974 Final Environmental Statement for Oyster Creek and NUREG-1437, Vol. 1, Supplement 28, “Generic Environmental Impact Statement for License Renewal of Nuclear Plants Regarding Oyster Creek Nuclear
