303 and 308 of the Communications Act of 1934, as amended.

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Privacy Impact Assessment: No impact(s).

Needs and Uses: The Commission received OMB approval on December 29, 2008 under the emergency process procedures for a period of six months for the changes to FCC Form 340 that were necessary to accommodate applications by a DTV station for a DTS facility. The Commission now is requesting OMB approval for a period of three years for the requirements and changes to FCC Form 340.

In addition, the Commission is revising this information collection to eliminate the requirements that are no longer necessary because of the completion of the DTV transition on June 12, 2009. In particular, collections relating to the filing of applications for construction permits and broadcast licenses for analog TV stations are discontinued now that all full-power TV stations will broadcast only in digital. Therefore, with this submission the Commission is discontinuing FCC Form 302-TV now that all full-power TV stations will broadcast only in digital. The associated burdens and costs related to FCC Form 302-TV are removed from this collection.

Form 302-DTV is used by licensees and permittees of Digital TV ("DTV") broadcast stations to obtain a new or modified station license and/or to notify the Commission of certain changes in the licensed facilities of those stations. It may be used: (1) To cover an authorized construction permit (or auxiliary antenna), provided that the facilities have been constructed in compliance with the provisions and conditions specified on the construction permit; or (2) To implement modifications to existing licenses as permitted by 47 C.F.R. Sections 73.1675(c) or 73.1690(c).

FCC Form 340 is used by licensees and permittees to apply for authority to construct a new noncommercial educational ("NCE") FM and DTV broadcast station (including a DTS facility), or to make changes in the existing facilities of such a station. The FCC Form 340 is only used if the station will operate on a channel that is reserved exclusively for NCE use, or in the situation where applications for NCE stations on non-reserved channels are mutually exclusive only with one another.

Form 340's Newspaper Notice (third party disclosure) requirement; 47 CFR 73.3580. Form 340 also contains a third

party disclosure requirement, pursuant to § 73.3580. This rule requires stations applying for a new broadcast station, or to make major changes to an existing station, to give local public notice of this filing in a newspaper of general circulation in the community in which the station is located. This local public notice must be completed within 30 days of the tendering of the application. This notice must be published at least twice a week for two consecutive weeks in a three-week period. In addition, a copy of this notice must be placed in the station's public inspection file along with the application, pursuant to Section 73.3527. This recordkeeping information collection requirement is contained in OMB Control No. 3060-0214, which covers Section 73.3527.

FCC Form 349 is used to apply for authority to construct a new FM translator or FM booster broadcast station, or to make changes in the existing facilities of such stations.

Form 349's Newspaper Notice (third party disclosure) requirement; 47 CFR 73.3580. Form 349 also contains a third party disclosure requirement, pursuant to § 73.3580. This rule requires stations applying for a new broadcast station, or to make major changes to an existing station, to give local public notice of this filing in a newspaper of general circulation in the community in which the station is located. This local public notice must be completed within 30 days of the tendering of the application. This notice must be published at least twice a week for two consecutive weeks in a three-week period. In addition, a copy of this notice must be placed in the station's public inspection file along with the application, pursuant to § 73.3527. This recordkeeping information collection requirement is contained in OMB Control No. 3060-0214, which covers § 73.3527.

Needs and Uses: The Commission has determined that the authorized resale of international private lines interconnected to the U.S. public switched network would tend to divert international message telephone service (IMTS) traffic from the settlements process and increase the U.S. net settlements deficit. The information will be used by the Commission in reviewing the impact, if any, that end-user private line interconnections have on the Commission's international settlements policy.
