

or process source material at the proposed ISR facilities. The license review process analyzes the construction, operation, and decommissioning of ISR facilities and restoration of the aquifer from which the uranium is being extracted. The ISR facilities would be located in Campbell and Johnson Counties, Wyoming, approximately 46 miles south-southwest of Gillette, Wyoming and approximately 61 miles north-northeast of Casper, Wyoming. The applicant would be issued an NRC license under the provisions of 10 CFR part 40.

Other alternatives not listed here may be identified through the environmental review process.

4.0 Environmental Impact Areas To Be Analyzed

The following areas have been tentatively identified for analysis in the SEIS:

- *Land Use:* Plans, policies, and controls;
- *Transportation:* Transportation modes, routes, quantities, and risk estimates;
- *Geology and Soils:* Physical geography, topography, geology, and soil characteristics;
- *Water Resources:* Surface and groundwater hydrology, water use and quality, and the potential for degradation;
- *Ecology:* Wetlands, aquatic, terrestrial, economically and recreationally important species, and threatened and endangered species;
- *Air Quality:* Meteorological conditions, ambient background, pollutant sources, and the potential for degradation;
- *Noise:* Ambient, sources, and sensitive receptors;
- *Historical and Cultural Resources:* Historical, archaeological, and traditional cultural resources;
- *Visual and Scenic Resources:* Landscape characteristics, manmade features and viewshed;
- *Socioeconomics:* Demography, economic base, labor pool, housing, transportation, utilities, public services/facilities, and education;
- *Environmental Justice:* Potential disproportionately high and adverse impacts to minority and low-income populations;
- *Public and Occupational Health:* Potential public and occupational consequences from construction, routine operation, transportation, and credible accident scenarios (including natural events);
- *Waste Management:* Types of wastes expected to be generated, handled, and stored; and

- *Cumulative Effects:* Impacts from past, present, and reasonably foreseeable actions at and near the site(s).

This list is not intended to be all inclusive, nor is it a predetermination of potential environmental impacts.

5.0 The NEPA Process

The SEIS for the Nichols Ranch ISR Project will be prepared pursuant to the NRC's NEPA Regulations at 10 CFR part 51. The NRC will continue its environmental review of the application and as soon as practicable, the NRC and its contractor will prepare and publish a draft SEIS. NRC currently plans to have a 45-day public comment period for the draft SEIS. Availability of the draft SEIS and the dates of the public comment period will be announced in the **Federal Register** and the NRC Web site: <http://www.nrc.gov>. The final SEIS will include responses to public comments received on the draft SEIS.

Dated at Rockville, Maryland, this 28th day of July 2009.

SUPPLEMENTARY INFORMATION: The standard review plan (SRP) for the review of a license application for a fuel cycle facility (NUREG-1520) provides NRC staff guidance for reviewing and evaluating the safety, health, and environmental protection aspects of applications for licenses to possess and use SNM to produce nuclear reactor fuel. The licensing guidance revision is also intended to provide information needed to better risk-inform the preoperational readiness reviews. Specifically, items or features or aspects of the design identified during the licensing review as important, will be highlighted to verify compliance with specific commitments during the preoperational readiness reviews.

The SRP has been updated to improve and enhance the guidance by providing increased clarity and definition in specific areas of the licensing program and adding additional guidance in areas where information was lacking or not suitably addressed. This effort was focused on improving both the clarity, and also consistency, of the SRP, with the Agency positions that support compliance with current regulations. In addition, this revision has been reformatted and reorganized to improve the consistency within the document.
