National Agricultural Statistics Service

Title: Census of Agriculture Content Test.

OMB Control Number: 0535-0243.

Summary of Collection: The purpose of the content test is to evaluate factors impacting the National Agricultural Statistics Service (NASS) Census of Agriculture program. The factors include, but are not limited to, respondent burden, questionnaire format and design, new items, changes in question wording and location, ease of completion, and processing methodology such as edit and summary. The proposed forms and letters will be used in a 2010 and 2011 test in preparation for taking the 2012 Census of Agriculture. NASS is responsible for conducting the Census of Agriculture under the authority of the Census of Agriculture Act of 1997, Public Law 105-113 (U.S.C. 2204g).

Need and Use of the Information: The Census of Agriculture Content Test is critical to NASS' ability to design a successful census survey. The actual Census of Agriculture is required by law every five years and serves as the basis for many agriculturally-based decisions. Less frequent content test collections would hinder NASS' ability to adequately evaluate changes needed to improve census data collection and therefore recognize changing trends in agriculture.

Description of Respondents: Farms.

Number of Respondents: 35,450.

Frequency of Responses: Reporting: Other (every 5 years).

Total Burden Hours: 21,588.

Economic Research Service

Title: Food Security Supplement to the Current Population Survey.

OMB Control Number: 0536-0043.

Summary of Collection: The Food Security Supplement is sponsored by the Economic Research Service (ERS) as a research and evaluation activity authorized under section 17 of the Food Stamp Act of 1977 as amended. ERS is collaborating with the Food and Nutrition Service (FNS) and the Bureau of Census to continue this program of research and development. The Supplemental Nutrition Assistance Program (SNAP) is currently the primary source of nutrition assistance for low-income Americans enabling

households to improve their diet by increasing their food purchasing power. As the nation's primary public program for ensuring food security and alleviating hunger, the SNAP needs to regularly monitor food security conditions among its target population. This monitoring need requires that USDA continue basic data collection, analysis, and evaluation.

Need and Use of the Information: The data collected by the food security supplement will be used to monitor the prevalence of food security and the prevalence and severity of food insecurity among the Nation's households. The prevalence of these conditions as well as year-to-year trends in their prevalence will be estimated at the national level and for population subgroups. The data also will be used to monitor the amounts that households spend for food and their use of community food pantries and emergency kitchens.

Description of Respondents: Individuals or Households.

Number of Respondents: 54,400.

Frequency of Responses: Reporting: On occasion.
