Questions about the Proposed Action and SEIS should be addressed to Michael Hasty, Project Manager, Regulatory Branch, Louisville District, at (502) 315-6676, e-mail Michael.D.Hasty@usace.army.mil.

SUPPLEMENTARY INFORMATION: 1.

Proposed Action. The project proposed by EKPC would include the construction and operation of a 278-megawatt CFB unit and associated infrastructure on the 3,272-acre Smith Site owned by EKPC in southern Clark County, Kentucky. The Proposed Action is needed to provide sufficient electric generating capacity to meet the baseload electric power needs of EKPC's rural member distribution cooperatives in 2013. Fuel would be supplied to the plant site by rail or truck. The construction of a substation and approximately one mile of 345 kV transmission line on the Smith Site would be required to connect the CFB unit to EKPC's transmission system at the existing, on-site J.K. Smith 345 kV Switching Station.

The discharge of fill material into waters of the U.S. would be required for the construction of two (2) CCB beneficial reuse structural fills; two (2) on-site CCB landfills; an emergency drought water storage reservoir; and several soil borrow areas for landfill cover and other on-site uses. The Proposed Action also would include the construction of a combined water supply intake and process water discharge outfall in the Kentucky River. EKPC's schedule calls for the proposed facility to be operational by spring 2013.

2. Alternatives. Alternatives to be considered by the Corps include no action, purchased power, renewable energy sources, distributed generation, non-renewable energy resources (including the Proposed Action), nuclear, demand side management, and alternative site locations. The Corps' review of alternatives also will include the application of the Section 404(b)(1) guidelines to ensure the avoidance, minimization, and mitigation of impacts to aquatic resources.

3. Scoping Process. RUS previously engaged in a scoping process for the Proposed Action that will serve as the basis for the SEIS. Following RUS's October 6, 2006 NOI, that agency conducted scoping meetings for government agencies and the public in Trapp, Kentucky, on October 18, 2006. An Alternatives Evaluation and Site Selection Study (Alternatives Report), prepared by EKPC, was made available for review at the scoping meeting and on the RUS Web site. That Alternatives

Report and the Public Scoping Report developed as a result of the scoping process and scoping meetings are available for public review at the Corps at the address provided in this notice, and on EKPC's Web site at <http://www.ekpc.coop/smith-unit1.html>.

Because the Corps has participated as a cooperating agency with RUS in the NEPA process, and because the nature of the Proposed Action has not changed materially (except with the reduction from two CFB units to one CFB unit), the Corps intends to rely on the prior scoping process to complete and publish the Draft SEIS. In addition the Corps will continue consultations with the appropriate agencies.

4. Availability. The Draft SEIS is anticipated to be available for public review and comment in September or October 2009.

Dated: September 8, 2009.

Keith A. Landry,

Colonel, Corps of Engineers, District Commander.
