C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

As part of the process of amending the OFAC Letter, the Clearing Agencies solicited and received comments from representatives of the industry groups that submitted comments to SR-NSCC-2009-03. The Clearing Agencies will notify the Commission of any additional written comments they receive.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule changes have become effective upon filing pursuant to Section 19(b)(3)(A)(iii) of the Act⁸ and Rule 19b-4(f)(4)⁹ thereunder because each of the proposed rule changes effects a change in an existing service of one of the Clearing Agencies that (i) does not adversely affect the safeguarding of securities or funds in the custody or control of the Clearing Agencies or for which it is responsible and (ii) does not significantly affect the respective rights of the clearing agencies or persons using the service. At any time within sixty days of the filing of such rule changes, the Commission may summarily abrogate such rule changes if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

The mailing address for both officials is: NHTSA, 1200 New Jersey Ave., SE., Washington, DC 20590.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995, before a proposed collection of information is submitted to OMB for approval, Federal agencies must first publish a document in the **Federal Register** providing a 60-day comment period and otherwise consult with members of the public and affected agencies concerning each proposed collection of information. The OMB has promulgated regulations describing what must be included in such a document. Under the OMB regulation (at 5 CFR 1320.8(d)), an agency must ask for public comment on the following:

- (i) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (ii) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (iii) How to enhance the quality, utility, and clarity of the information to be collected; and
- (iv) How to minimize the burden of the collection of information on those

who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

In this notice, we are soliciting public comment on the following collection of information of manufacturers' production plan data for model years (MYs) 2008–2020 in connection with NHTSA's establishing of passenger car and light truck CAFE standards for model years 2012–2016. We are asking OMB for processing through emergency procedures established at 5 CFR Section 1320.13, and have asked OMB to approve or disapprove this collection within a week.

Title: 49 CFR Parts 531 and 533 Passenger Car Average Fuel Economy Standards—Model Years 2008–2020; Light Truck Average Fuel Economy Standards—Model Years 2008–2020; Production Plan Data.

OMB Control Number: 2127–0665.

Form Number: There are no standard forms associated with this collection of information.

Requested Expiration Date of Approval: Ninety days from approval date.

Type of Request: Emergency clearance.

Summary of the Collection of Information: In this collection of information, NHTSA is requesting any updates to previously submitted future product plans from vehicle manufacturers, as well as production data through the recent past, including data about engines and transmissions for model year (MY) 2008 through MY 2020 passenger cars and light trucks and the assumptions underlying those plans. The submission of product plan information by manufacturers to NHTSA is voluntary.

NHTSA requests information for MYs 2008–2020 to supplement other information used by NHTSA in developing a realistic forecast of the MY 2012–2016 vehicle market, and in evaluating what technologies may feasibly be applied by manufacturers to achieve compliance with the MY 2012–2016 standards. Information regarding earlier model years may help the agency to better account for cumulative effects such as volume- and time-based reductions in costs, and also may help to reveal product mix and technology application trends during model years for which the agency is currently receiving actual corporate average fuel economy (CAFE) compliance data. Information regarding later model years

may help the agency gain a better understanding of how manufacturers' plans through MY 2016 relate to their longer-term expectations regarding Energy Independence and Security Act requirements, market trends, and prospects for more advanced technologies.

NHTSA will also consider information from model years before and after MYs 2012–2016 when reviewing manufacturers' planned schedules for redesigning and freshening their products, in order to examine how manufacturers anticipate tying technology introduction to product design schedules and to consider how the agency should account for those schedules in its analysis for the final rule. In addition, the agency is requesting information regarding manufacturers' estimates of the future vehicle population, and fuel economy improvements and incremental costs attributed to this notice.

Description of the Need for the Information and the Proposed Use of the Information:

NHTSA needs the information described above to aid in assessing what CAFE standards should be established for model years 2012 through 2016 passenger cars and light trucks.

Description of the Likely Respondents (Including Estimated Number and Proposed Frequency of Response to the Collection of Information):

It is estimated that this collection affects approximately 22 motor vehicle manufacturers. The information that is the subject of this collection of information is collected once, for the final rule.

Estimate of the Total Annual Reporting and Recordkeeping Burden Resulting from the Collection of Information: The estimated burden is as follows:

It is estimated that this collection affects approximately 22 vehicle manufacturers. One major manufacturer (General Motors) estimated their burden to be approximately 4,300 hours. The burden to other manufacturers was estimated using sales weights relative to General Motors' total sales (e.g., if a manufacturer produces 50 percent as many vehicles as General Motors, their burden is estimated to be $4,300 \times 0.5 = 2,150$ hours). Therefore the burden to each manufacturer depends on the number of vehicles that manufacturer produces. The total estimated burden is 16,000 hours annually.

Number of Affected Vehicle Manufacturers	22
Annual Labor Hours for Each Manufacturer To Prepare and Submit Required Information	Variable.
Total Annual Information Collection Burden	16,000 hours.

The monetized cost associated with this information collection is determined by multiplying the total labor hours by an appropriate labor rate. For this information collection, we believe vehicle manufacturers will use mechanical engineers to prepare and submit the data. Therefore, we are applying a labor rate of \$36.02 per hour which is the median national wage for mechanical engineers.¹ Thus, the estimated monetized annual cost is 16,000 hours × \$36.02 per hour = \$576,320.

Authority: 44 U.S.C. 3506(c); delegation of authority at 49 CFR 1.50.

Julie Abraham,

Director, International Policy, Fuel Economy and Consumer Programs.
