

registrations and then granted the voluntary cancellation requests, establishing effective cancellation dates (FRL-8437-1); (74 FR 48551) for all of the products registered for use in the United States containing the active ingredient, disulfoton. The Agency described the impact of the cancellations on the registration review of disulfoton in the Final Work Plan, which was issued on October 1, 2009. Due to the cancellation order issued affecting all disulfoton product registrations in the United States, the Agency has found that it is not necessary to conduct new risk assessments for disulfoton and is therefore issuing a proposed decision pursuant to 40 CFR 155.53(c)(2) and 40 CFR 155.58. The Agency believes that mitigation measures put into effect on product labeling through the reregistration process are adequate to protect human health and the environment until existing stocks of disulfoton are exhausted. This proposed registration review decision is described in more detail in the Disulfoton Proposed Registration Review Decision, available in the disulfoton docket.

Following public comment, the Agency will issue a registration review final decision for products containing disulfoton.

The registration review program is being conducted under congressionally mandated time frames, and EPA recognizes the need both to make timely decisions and to involve the public. Section 3(g) of FIFRA, as amended, required EPA to establish by regulation procedures for reviewing pesticide registrations, originally with a goal of reviewing each pesticide's registration every 15 years to ensure that a pesticide continues to meet the FIFRA standard for registration. The Agency's final rule to implement this program was issued in August 2006, and became effective in October 2006, and appears at 40 CFR part 155, subpart C. The Pesticide Registration Improvement Act of 2003 (PRIA) was amended and extended in September 2007. FIFRA, as amended by PRIA in 2007, requires EPA to complete registration review decisions by October 1, 2022, for all pesticides registered as of October 1, 2007.

The registration review final rule at 40 CFR 155.58(a) provides for a minimum 60-day public comment period on all proposed registration review decisions. This comment period is intended to provide an opportunity for public input and a mechanism for initiating any necessary amendments to the proposed

decision. All comments should be submitted using the methods in **ADDRESSES**, and must be received by EPA on or before the closing date. These comments will become part of the docket for disulfoton. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments.

The Agency will carefully consider all comments received by the closing date and will provide a "Response to Comments Memorandum" in the docket. The registration review decision will explain the effect that any comments had on the decision and provide the Agency's response to significant comments.

Background on the registration review program is provided at: http://www.epa.gov/oppsrrd1/registration_review. A link to earlier documents related to the registration review of disulfoton is provided at: http://www.epa.gov/oppsrrd1/registration_review/reg_review_status.htm.

B. What is the Agency's Authority for Taking this Action?

Section 3(g) of FIFRA and 40 CFR part 155, subpart C, provide authority for this action.

List of Subjects

Environmental protection, Administrative practice and procedure, Pesticides and pests, disulfoton.

Dated: October 19, 2009.

Using the guide below, please grade Ex-Im Bank as it compares to other ECAs in the following categories based on your experience during CY 2009. If you have not had experience relating to a specific feature, please select 'N/A'.

[Note: When the survey is being completed on-line, if the cursor is placed over an element in which Ex-Im Bank is to be graded then the definition of that element will "pop up." The definitions for each of the elements are found in the "Part 3 Attachment."]

A+	= Fully competitive. Consistently equal to the (or is the sole) ECA offering the most competitive position on this element. Levels the playing field on this element with the most competitive offer from any of the major ECAs.
A	= Generally competitive. Consistently offers terms on this element equal to the average terms of the typical major ECA. Levels the playing field on this element with the typical offer from the major ECAs.
A-/B+	= In between A and B
B	= Modestly competitive. Consistently offers terms on this element equal to the least competitive of the major ECAs. Does not quite level the playing field on this element with most of the major ECAs.
B-/C+	= In between B and C
C	= Barely competitive. Consistently offers terms on this element that are a notch below those offered by any of the major ECAs. Puts exporter at financing disadvantage on this element that may, to a certain extent, be compensated for in other elements or by exporter concessions.
C-/D+	= In between C and D
D	= Uncompetitive. Consistently offers terms on this element that are far below those offered by other major ECAs. Puts exporter at financing disadvantage on this element so significantly that it is difficult to compensate for and may be enough to lose a deal.
F	= Does not provide program or element
